

Hybrid Elite Cushion

Adjustable, durable neoprene rubber cushion insert

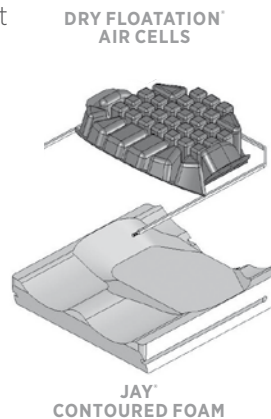

Lightweight and stable surface

Fluid resistant Jay® contoured foam base

Dry Floatation® skin protection and shape matching ability

The Hybrid Elite is a unique wheelchair cushion that combines the superb skin protection and shape matching ability of Roho® Dry Floatation® with the stability of Jay® base technology for critical pressure redistribution around the pelvis area.

- Adjustable, durable neoprene rubber cushion insert
- Fluid resistant Jay® contoured foam base for enhanced posture and pelvis positioning
- Stable surface facilitates safer transfers to and from a wheelchair
- Non-powered for easy portability
- Low friction and shear environment
- Lightweight cushion (1.5 Kg; varies by size)
- 3 Different sizes; 100 mm high
- Suitable for users to a maximum of 225 kg

Simple to adjust, the Hybrid Elite is designed to improve position and function by allowing for improved pelvic alignment and stability while maintaining optimal immersion and envelopment of both the sitting bones (ischial tuberosities) and greater trochanters.

Hybrid Elite Cushion

Heavy Duty Cover
(waterproof, incontinence cover)
available as optional accessory.

ROHO DRY FLOATATION products are made of soft, flexible interconnected air cells designed to conform to each user's individual body shape and self-adjust with every movement, enhancing blood flow and supporting posture. The low surface tension allows for immersion without tissue deformation, minimising the risk of skin breakdown.

The Jay contoured foam base, engineered specifically for ROHO, provides improved positioning of the

pelvis and lower extremities to enhance sitting posture. This added stability helps to achieve safer transfers in and out of a wheelchair.

Available in a range of sizes, the Hybrid Elite includes an easy to fit, lightweight, machine washable, two way stretch Universal Cover for increased comfort and ease of cleaning. The two way stretch top allows cushion cells to conform to the user's body shape without diminishing therapeutic value.

A non-skid base with Velcro helps secure the cushion to the chair while reinforced side panels protect the cushion from lateral contact.

Comes complete with a hand inflation pump, repair kit and operating instructions.

- Heavy duty incontinence cover available as an optional accessory
- Additional models (sizes) available upon request
