

ProSling

Patient lifting slings for **yoke** frame lifters

A range of slings designed to lift patients from seated (chair) or reclined (bed or floor) positions.

- Versatile enough for general patient transfers, toileting or hygiene care
- Manufactured from the highest quality material; conforms to industry standards (AS/NZS ISO 10535:2011)
- Heavy duty, quick dry 3 mm quilted foam padding in leg and head support sections delivering increased patient comfort
- Brightly coloured handles and adjusters, for easy access and visibility
- Colour coded sling straps provide easy identification of sling size
- Three loop support strap system, controls positioning of head and leg supports
- Suits users to a maximum weight of 205 kg (Small and Medium); and 300 kg (Large, Extra Large and Extra Extra Large)

Will suit the majority of lifter products on the market. Some lift manufacturers make claims that only their brand of sling should be used on their lifter. There is no Australian Government or TGA directive to support these claims.

General Purpose

Provides good support for patients with basic upper body control.

General Purpose with Head Support

In built head support creates a secure transfer for patients with less controlled body movements.

Hygiene

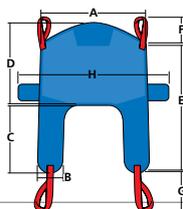

Designed for toilet transfer, includes a waist strap with buckle fastening for added security and generous padding under arms and around mid section.

Hygiene with Head Support

Designed for toilet transfer, in built head support creates a secure transfer for patients with less controlled body movements.

DIMENSIONS in mm

It is very important to use the correct sized sling and ensure it is properly fitted before attempting to lift. This will ensure the patient feels safe, dignified and comfortable, and allows the carer to be confident of an effective and safe procedure. Please refer to the ProSling Size Selection Chart for guidance on sizing recommendations. This chart is published in the ProSling Range Guide and is available to download from www.novis.com.au

THERAPEUTIC DEVICES SHOULD ONLY BE USED IN ACCORDANCE WITH MANUFACTURERS INSTRUCTIONS AND UNDER THE CONSENT, SUPERVISION AND MANAGEMENT OF A SUITABLY QUALIFIED HEALTH PROFESSIONAL.
