

Air Transfer Mat

Float on a cushion of air. Safer and easier lateral transfer for patients and carers.

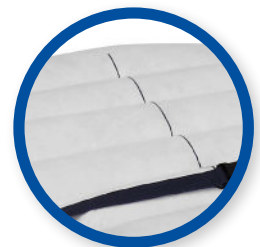

**REINFORCED
HANDLES**

**DUAL CONNECTION
POINTS**

**COMPATIBLE
PUMP DESIGN***

**SWL UP
TO 450KG**

GREATER STAFF SAFETY AND PATIENT COMFORT

- 80-90% less physical effort needed to perform transfers, greatly reducing injury risks to carers.
- The Novis Air Transfer Mat cradles and supports the patient, maintaining a stable position while transferring.
- Proven design eliminates shearing and friction forces providing more comfortable patient transfers.

AVAILABLE IN 3 SIZES

CODE	SIZE (W x L)
ATM102D	864x1980 mm
ATM103D	990x1980 mm
ATM104D	1270x1980 mm

BLOWER PUMP

ATMP001	Air Transfer Mat Blower Pump
---------	------------------------------

*All Novis Air Transfer Mats are compatible with many of the most commonly available pump units

INFECTION CONTROL AND COST EFFECTIVENESS

- Single patient use mats deliver greater infection control management.
- Save time and costs on decontamination as no laundering is required.
- Greatly reduce costs associated with reductions in caregiver/nursing injuries.
- Number of staff required is significantly reduced during manual handling transfers representing cost and time efficiency.

EFFECTIVE FOR A WIDE RANGE OF PATIENT TRANSFER & MOVEMENT REQUIREMENTS

- Accommodates various patient sizes up to 450kg.
- Vapour permeable nylon helps manage microclimate while helping provide added protection against shear and friction.
- Heavy duty patient safety straps and handles.
- Radiolucent/MRI safe.

- Electrical Power Cord
- Support Brackets
- Pump Controls On/Off
- Hose Connection Point
- 2nd Hose Connection Point
- Colour Coded Transfer Handles
- Safety Strap Buckles (only fully tighten when inflated)
- Air Hose
- Cord Retention Strap
