

## Portable Vibrating Doorbell BL5003

A portable doorbell designed for the hearing and vision impaired, with strobe lighting, a vibration function and a range of alternative chime melodies.

The BetterLiving Portable doorbell provides a variety of melodies and has three different operation modes: ringing, vibrating, and flashing. In addition, the doorbell comes with a remote controlled transmitter that has a stable and long-range signal, which can be received from any location within the home.

The doorbell has multiple modes and ringtones for customisable alerts. It also comes equipped with a back clip that allows for easy and convenient portability by attaching it to a belt or pocket.
