

7 Reasons to Consider a Netti 4U CE Plus

1. LIGHT WEIGHT AND MANOEUVRABLE

With an overall width only 18cm wider than the seat, the Netti 4U CE Plus is one of the narrowest chairs on the market. This makes for improved manoeuvrability of this lightweight chair, making it easier to steer, control and fit through doorways!

2. SEAT WIDTH FLEXIBILITY

Comfort pads and seat width extension options ensure an ergonomic and economic solution for the user. The seat width can be adjusted 20 or 40 mm in or out using the seat width extension kit, meaning the chair can change to accommodate varying user requirements.

3. FLEXIBLE BACK SOLUTION

The Netti 4U CE Plus is equipped with a one-piece Velcro style back and a back cushion that can be adjusted for a user's height. Furthermore, you can choose from our complete product range of cushions, giving different levels of support for the trunk.

4. HYGIENIC COVERS

Easy cleaning and hygienic care are facilitated via the Easy Care water resistant covers. This easy

clean feature makes the chair well suited for cases of incontinence or for use amongst multiple residents in hospitals and facilities.

5. SIMPLIFIED TRANSFERS

One-hand operated arm supports help facilitate easy transfers and improve access. Arm supports are height and depth adjustable as well as easily removed and replaced using only one hand, making it great for sideways or sling transfers. This feature is complimented by a folding brake lever to provide the best possible access.

6. ACCESSORIES

Further customisation and adaptability to the Netti 4U CE Plus can be achieved through a broad range of accessories. This makes the 4U CE Plus extremely adaptable to a user's changing needs.

7. COST EFFECTIVE

The Netti 4U CE Plus offers great value. A list of standard inclusions and product features provide a cost effective solution to a users needs at a very competitive market price. Contact our customer service for more information!
