

This information is intended as a guide only, it does not replace thorough individual assessment, advice of a qualified health professional or specific policies and procedures.

- General Advice to consider:**
- Ensure full shower assessment is completed with water
 - Grab rails at entry and inside the shower
 - Non slip mats inside and outside shower
 - A hand held height adjustable shower head
 - Etac Long handed shower aids and soap holder attachments
 - Adjust seat heights to popliteal height (with 20% extra if required)
 - Bariatric equipment if weight or proportions exceed limits of the equipment
