

## **NOVIS BED CATALOGUE 2024**

# Newport Floor Bed

Designed to reduce the risk of injury from falls and minimise the need for restraints, this fully featured, column-less electric bed can be lowered to an ultra low height of 110 mm from the floor. The bed also features a 740 mm high working height for increased carer ergonomics.

With expansive safety features and a range of design options, this versatile bed offers multiple positioning for maximum client care and comfort.

Available in Single and King Single sizes.

## Accessories

### Telescopic Side Rails

BE9012 (Sold as Pair)

Collapsible telescopic side rail system attaches firmly to bed frame. Simply drop down any of the 1-4 rails for client access or transfer.

### Back Up Battery

BE9013

A rechargeable battery pack designed for operation, in the event of a power failure. Battery attaches under the bed frame.

### Self Help Pole

BE9014

Support pole to aid client repositioning while lying in bed. Mounts into inbuilt brackets at either side of bed head.

### IV Pole

BE9015

For clients on intravenous fluids. Mounts into inbuilt brackets at either side of bed head.

### Side Panels

BE9016 (Sold as Pair)

Fabric, laminate, or vinyl side surround panels. 2 or 4 panel options depending on side rail configuration.

**Novis Healthcare**

Novis.com.au | 1300 738 885

### Underbed Light

Standard integrated safety lighting with automatic shut off. Initiated by any handset button and programmed to only go on at night.

### Linked Locking Castors

Easily lockable single motion foot end castors, as well as lockable head end castors. The Newport Floor Bed can be solidly locked to the floor without bed footprint creep or wall damage when raising or lowering.

### Length and Width Extensions

100-200 mm built in length extension and width extension kit available. Wipe clean mattress platform extension slides out at the foot end.

### Design Options

Fabric / vinyl surrounds, head boards and foot boards offer unmatched design versatility. Standard oak laminate, other customised style and finishes are available upon request.

### Quality Construction

Main frame constructed from powder coated steel for maximum strength. Adjustable, contoured mattress retainers for mattress options.

Auto-regression backrest and CPR function with dampened backrest drop for safety.

Powered by a high quality reliable Linak electric drive system with an inbuilt Back Up Battery available as an optional accessory.

### Hand Controller

Backlit electronic hand controller features clear icon labelled, soft press buttons for full functionality..

## Linak Electronics

Powered by a high quality Linak electric drive and constructed from durable powder coated steel. The frame includes a 200mm Length Extension and removable mattress retainers.

## Transport Design

Bed ends are easily removable and bed frame splits into 2 sections making set up and removal of the complete bed possible in tight spaces.

## Length Extension

200 mm built in length extension allows the foot end of the bed frame to extend to accommodate taller clients.

## Locking Castors

Easily lockable individual castors allow bed manouverability and access to improved client care.

## Hand Controller

Lightweight, water resistant hand controller with soft touch buttons and one touch auto contouring. Features lockout function, ideal for patients incapable of operating the bed due to cognitive impairment.

Each function can be individually locked out using the key, which is required to unlock and reactivate functionality.

## Quality Construction

Main frame constructed from powder coated steel for maximum strength.

Auto-regression backrest reduces friction and shear forces when the backrest is raised.

# Casero Duo Homecare Bed

A versatile low electric bed, designed for home and aged care use. The Duo includes a width and length expandable sleeping surface, which expands the bed from single to king single and length from Standard to extended 2200mm. The Casero Duo has a partial wheel locking system, allowing for easy moving of the bed, and comes with standard electric bed features of Hi/ Low, Back Elevation, Knee Break and Trendelenburg function. The European designed, vertically adjustable side rail options offer versatility, support, safety and protection. The bed can have no rails or any number 1-4 split rails.

Available in Single and King Single sizes.

## Accessories

### Telescopic Side Rails

BZ0443 (Sold as Pair)

Collapsible telescopic side rail system attaches firmly to bed frame. Simply drop down any of the 1-4 rails for client access or transfer.

### Clamp on Rail (400 mm)

BZ0548

Bed grab bar to help people get into and out of the bed. Installed securely on the bed frame and provides the user with a secure handhold.

### Self Help Pole

BZ0325

Support pole to aid client repositioning while lying in bed. Mounts into inbuilt brackets at either side of bed head.

### Back Up Battery

BZ0948

For emergency bed function in the event of a power outage. Provides height and bed contour adjustments without mains power.

### Modular Design

The Casero Duo is modular and configurable to your client's requirements and includes classic and contemporary designs, upholstery choices and high quality features.

### Linked Locking Castors

Easily lockable single motion foot end castors and direction locking head end castors. The Casero Duo can be solidly locked to the floor or unlocked for easy manoeuvrability.

### Length and Width Extensions

100-200 mm built in length extension and width extension to transform the mattress surface from a Single to King Single.

### Design Options

Fabric / vinyl surrounds, head boards and foot boards offer unmatched design versatility. Beds are configurable as kits with side rail options.

### Quality Construction

Main frame constructed from powder coated steel for maximum strength. Adjustable, contoured mattress retainers for mattress options.

Powered by a high quality reliable Linak electric drive system with the ability to program a bed scanner with Sip n Puff, Joystick or Jelly Bean button.

### Hand Controller

Sleek electronic hand controller features clear icon labelled, soft press buttons for full functionality.

# Icare IC333 Homecare Bed

With adjustable height, Trendelenburg tilt, head lift, and knee break capabilities, this bed frame can be easily configured to meet the needs of patients with different medical conditions and treatment requirements. The ICare IC333 Bed offers a reliable and flexible bed solution that meets the needs of both patients and healthcare providers.

Additionally, the fully upholstered surround is available in a range of fabrics, ensuring that the bed seamlessly blends into any healthcare environment.

Available in Long Single, King Single, Double, and Queen sizes.

## Accessories

### Full Length Side Rails ACFSRP (Sold as Pair)

Full length fold down rail available on the left and right-hand side. 4 Rails for maximum safety

### High Side Rail with Brackets ACHSR-B

Provides user support and stability, especially for getting in and out of bed.

### Low Side Rail with Brackets ACLSR-B

Provides user support and stability, preventing bed falls. 3 Rails for maximum safety.

### Freestanding Bed Pole ACPUB

Over bed to help with turning, patient transfer, and bed care. A stable design with heavy-duty steel, compatible with all Icare Beds.

## **Safety and Functionality**

Designed with all the function of a hi-lo bed including electric height adjustment, back rest, knee break and Trendelenburg tilt, to deliver multiple positioning options without looking like a hospital bed.

## **Back Up Battery**

External battery backup allows use of the bed functions regardless of power supply. The battery is rechargeable and particularly important for remote areas.

## **Quality Construction**

With a safe working load of 200kg, strong metal mesh under mattress allowing increased airflow, and 8 heavy duty swivel castors with one lockable castor on each corner.

## **Choice of Fabrics**

A wide range of hard-wearing commercial grade fabric options to suit the room. Matching head and foot boards available.

## **Hand Controller**

The backlit hand controller with easy press buttons for night-time use, features a wired stretch cord with a hook attachment for hanging on the side of the bed.

## **Adjustable Height**

Bed Height Range  
220 – 660 mm
