

Enabling Independence
Through Trusted Partnerships

Message from the Founder

For more than two decades, Novis Healthcare has been committed to one simple belief: when people are supported to remain independent, their quality of life improves.

Since founding Novis in 2002, my focus has been to provide healthcare professionals, dealer partners and care providers with trusted equipment solutions that deliver meaningful outcomes for the people who rely on them every day.

What began as a small Australian healthcare business has grown into a nationwide organisation supporting hospitals, aged care providers, rehabilitation services, community care organisations and individuals. Throughout that growth, our purpose has remained unchanged.

Today, Novis exclusively partners with some of the world's leading assistive technology manufacturers while continuing to develop and deliver our own innovative solutions designed specifically for local needs. Our product portfolio spans pressure care, patient handling, mobility, seating & positioning, bathroom safety, wheelchairs and daily living aids – all supported by clinical expertise, training and dedicated customer service.

We recognise that our success is built on the strength of our relationships. Together, we help people maintain dignity, mobility, comfort and independence at every stage of life.

Thank you for your continued partnership and trust. We look forward to supporting you and your clients for many years to come.

Why Partner with Novis?

Australian Owned

- Founded and operated in Australia
- Local decision making and accountability

National Coverage

- Supporting metropolitan, regional and remote communities
- Fast, reliable supply through a national distribution network

Education & Training

- Product training and education offering
- Clinical support and demonstrations

Experienced Team

- Responsive and knowledgeable customer service team
- Experienced sales and service teams across Australia
- Deep understanding of Australian healthcare environment

Trusted Global & Proprietary Brands

- Exclusive international product partnerships
- Innovative locally developed Novis product solutions
- Carefully selected products delivering quality clinical outcomes

Service Beyond the Product

- Equipment trials and demonstration stock
- Preventive maintenance and repairs
- Technical support and product servicing
- Equipment rental and short-term hire options

Product Warranty

- Minimum one year warranty on all products
- Many products have warranties of up to five years (as indicated in this catalogue)

Showrooms

Contact us to make a showroom appointment

- Sydney North: 20/12 Mars Road, Lane Cove West
- Sydney South: B3/15 Forrester Street, Kingsgrove
- Melbourne: 1/1-9 Arco Lane, Heatherton
- Brisbane: 3/59 Eastern Road, Browns Plains

We are here to support your team with the knowledge, training and expertise to deliver better outcomes.

In Person Training

We provide face-to-face, hands on product training and clinical education to ensure confidence in product selection, application and customer support. Our experienced team delivers practical, evidence training Australia wide. Reach out to us to ask for training by emailing novis@novis.com.au

Webinars

We run regular webinars designed to keep you informed about new products, industry trends, and best practices. Delivered by experienced product specialists and clinical experts, our webinars provide convenient, flexible access to build knowledge and enhance client outcomes. Visit novis.com.au to subscribe to our emails to receive webinar alerts.

Novis Emails

Novis emails keep dealer partners and healthcare professionals up-to-date with the latest product launches, industry news, educational resources, upcoming training opportunities, and promotional updates. Subscribe to our emails by visiting novis.com.au

Technical Support & Service Training

We provide comprehensive technical and service training to equip you with the knowledge and skills to install, maintain, troubleshoot, and service our products – particularly for Molift and ProCair ranges. Depending on the needs of your team, we can provide phone support access to our e-learning platform or in person training.

Pressure Care & Mattress Choice

Choosing the right support surface is a **key part of preventing and managing pressure injuries**. This guide outlines current best-practice recommendations, the main categories of

support surfaces, and the different **pressure care mattress systems** available, to help guide selection based on **individual risk** and **best outcomes**.

Guidelines

The International Guideline for Pressure Injury Prevention and Treatment (4th edition, 2025)* recommends a pressure redistribution foam mattress as standard care for individuals at risk of pressure injury, and identifies alternating pressure air mattresses as an effective alternative particularly for those at higher risk.

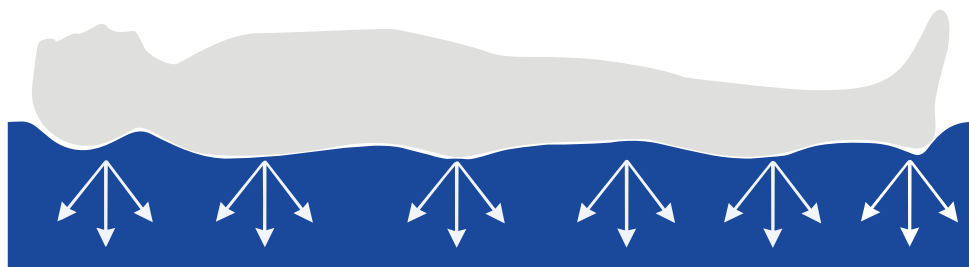

As individual risk depends on factors such as mobility, skin condition and overall health, mattress selection should always be guided by an individual assessment from a qualified health professional.

Mattress Support Surfaces

Support surfaces fall into two main categories (NPIAP, EPUAP, PPPIA):

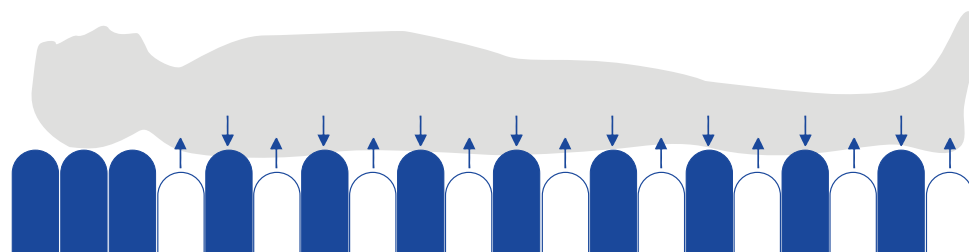

Reactive support surface

A powered or non-powered surface that changes its pressure redistribution properties only in response to an applied load.

Active support surface

A powered surface that changes its pressure redistribution properties independent of applied load.

Types of Pressure Mattresses

Alternating pressure systems contain a series of air-filled cells. A pump cyclically inflates and deflates different cells, usually every few minutes, alternating pressure across the body and reducing prolonged pressure on vulnerable areas such as the sacrum, hips and heels.

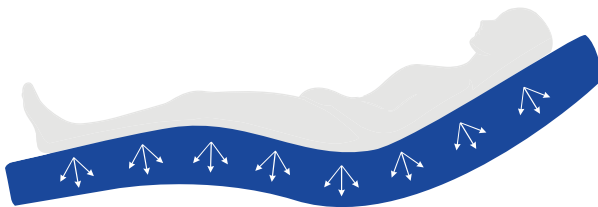

Powered hybrids combine the features of a reactive mattress (which redistributes pressure by conforming to the body) with an active alternating pressure system. They function as a static pressure-relieving surface based on immersion without a control unit connected but can "step up" to dynamic alternation when clinically required, once a control unit is connected.

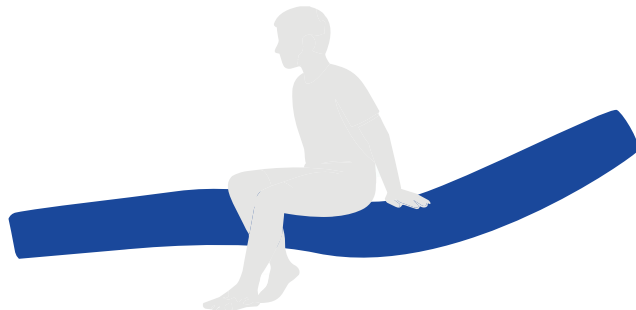

Static support surfaces are non-powered mattresses that redistribute pressure by conforming to the body's shape, using materials such as foam, gel or air to increase contact area and reduce pressure on vulnerable areas.

Principles of Pressure Care

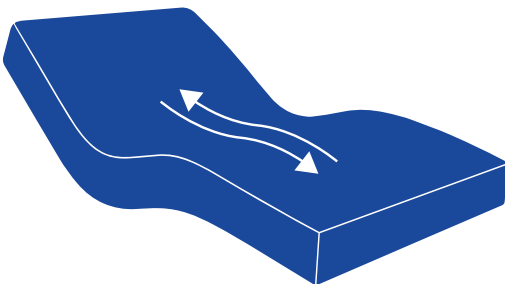

Pressure Redistribution

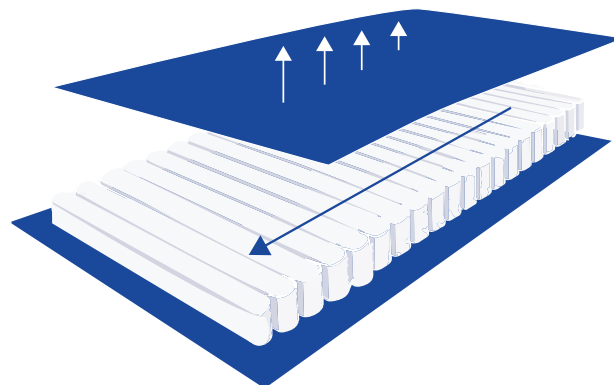

Repositioning & Mobility

Shear & Friction Reduction

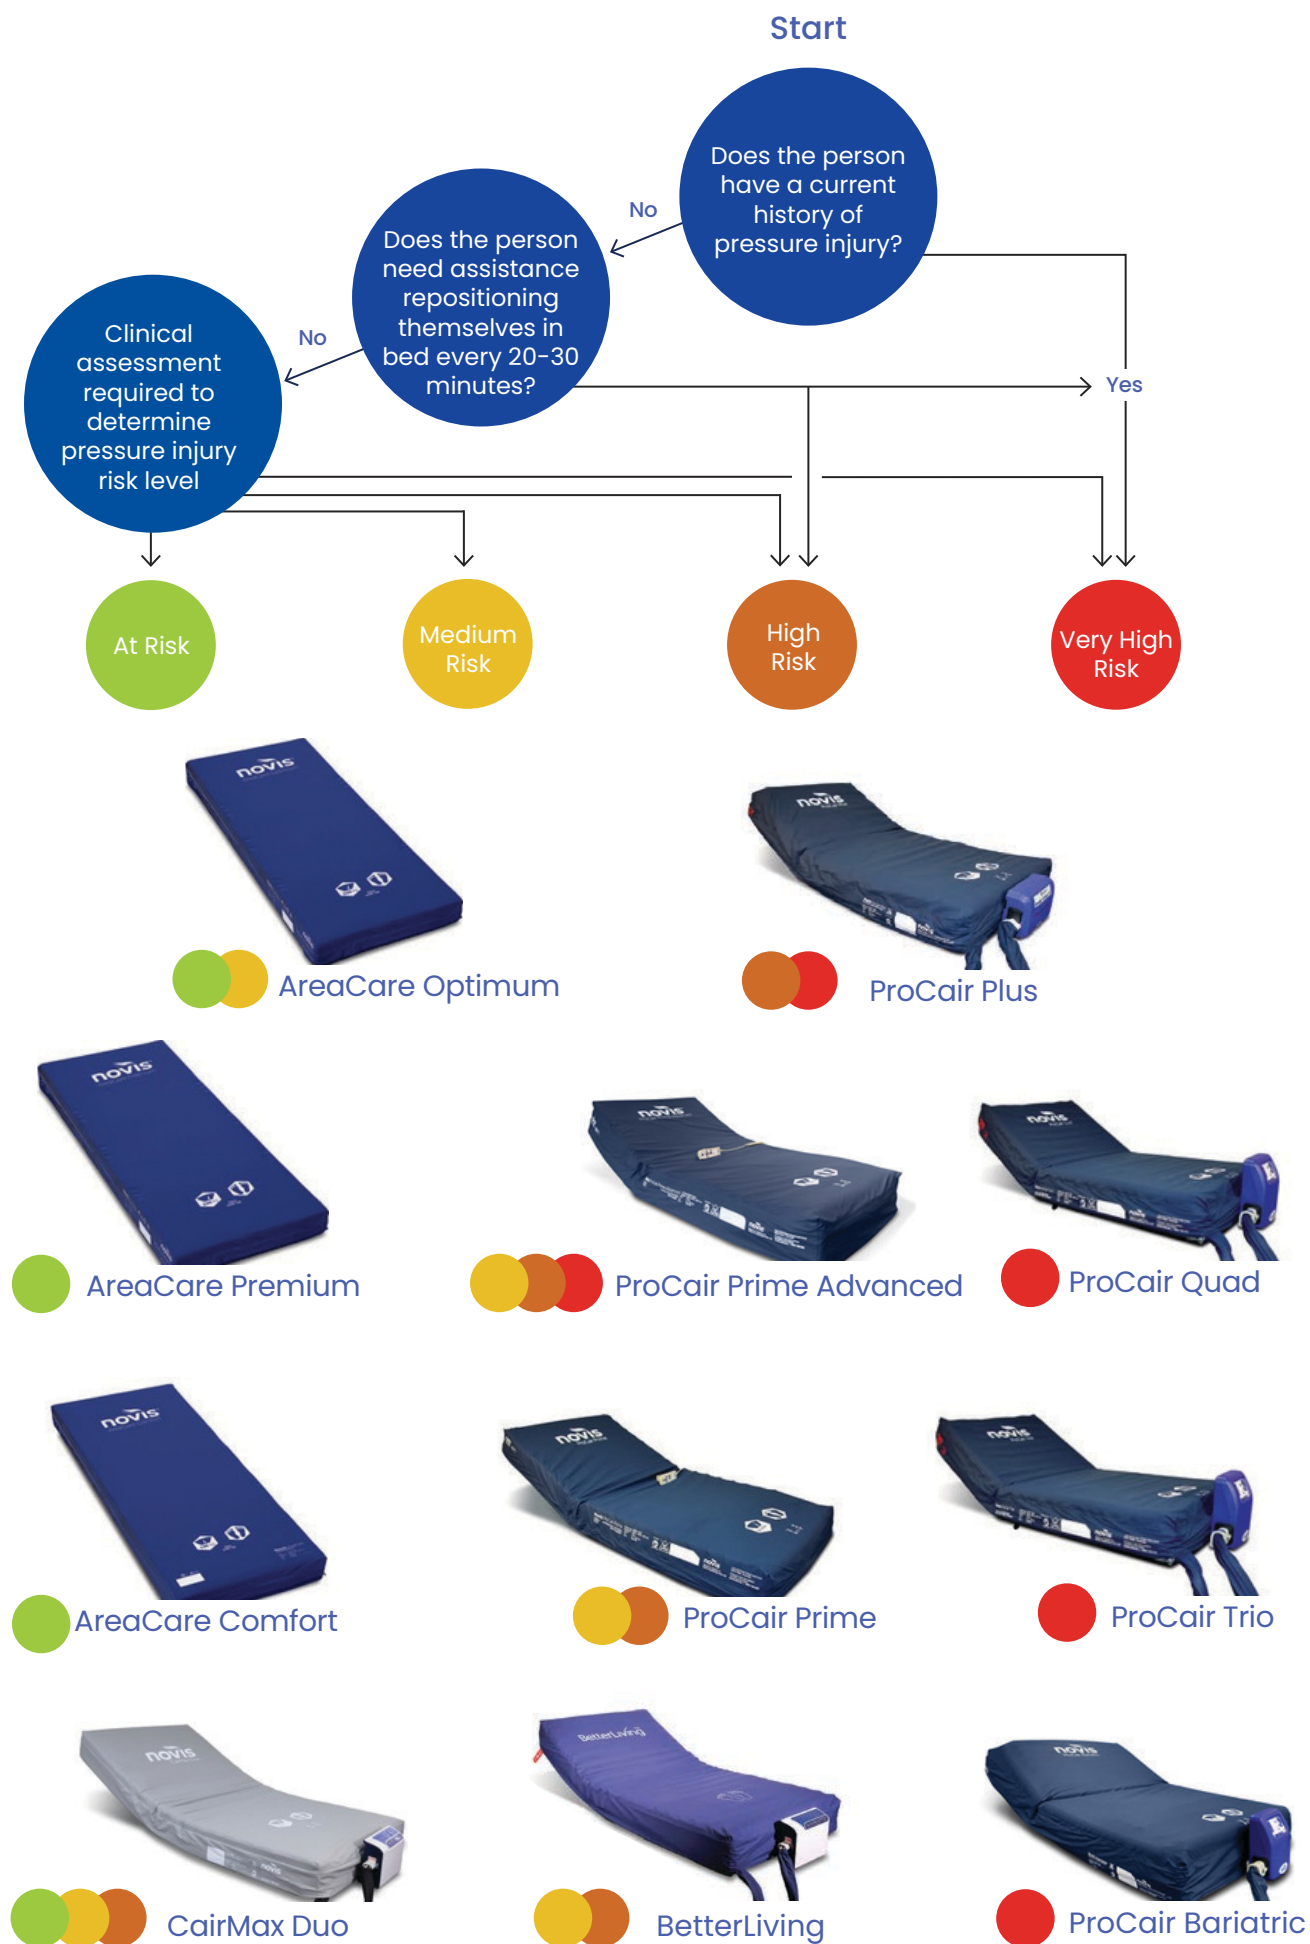

Microclimate Management

Mattress Selection Guide

ProCair® Range

ProCair is our leading range of alternating pressure mattresses for the prevention and treatment of pressure injuries. Featuring advanced technical innovation, this feature-rich range gives healthcare professionals alternating pressure mattress solutions suited to both long-term and acute care environments.

AutoCair

No more concerns over correct pressure level settings with our AutoCair feature – automatic weight sensing technology that automatically adjusts the pressure settings to keep the client within a safe pressure range for effective therapy.

ActivCair

Patients benefit from enhanced dynamic therapy and increased stability with the comfort of 1 in 3 or 1 in 4 alternation.

FailSafe

An inbuilt Back Up Battery unit provides the reassurance of up to 5 hours emergency back up power in event of a power failure or accidental power disconnection.

SafetyCair

The ultimate protection from 'bottoming out'. The alternating air cells contain a lower 'safety cell' which remains fully inflated to provide greater surface stability and patient safety.

HeelCair

Increased protection and therapy for vulnerable heels with an independent heel zone made up of narrower cells.

ClimateCair

Delivering maximum comfort, our ClimateCair cells are constructed from pure thermoplastic polyurethane (TPU) for enhanced comfort qualities.

CairAlert

Be alerted when your patient leaves the bed with an optional warning alarm that, when activated, will signal to indicate that the client has moved off the mattress.

AcuteCair

Effective infection control with a fully sealed base designed to minimise risk of bacterial contamination and maximise patient care and safety in an acute care environment.

A versatile and unique option for individuals at high risk of pressure injury. Designed to be used as a fully alternating pressure mattress that can be easily converted to a hybrid mattress. Built-in pump minimises trip hazards or damage from pumps being bumped off the bed.

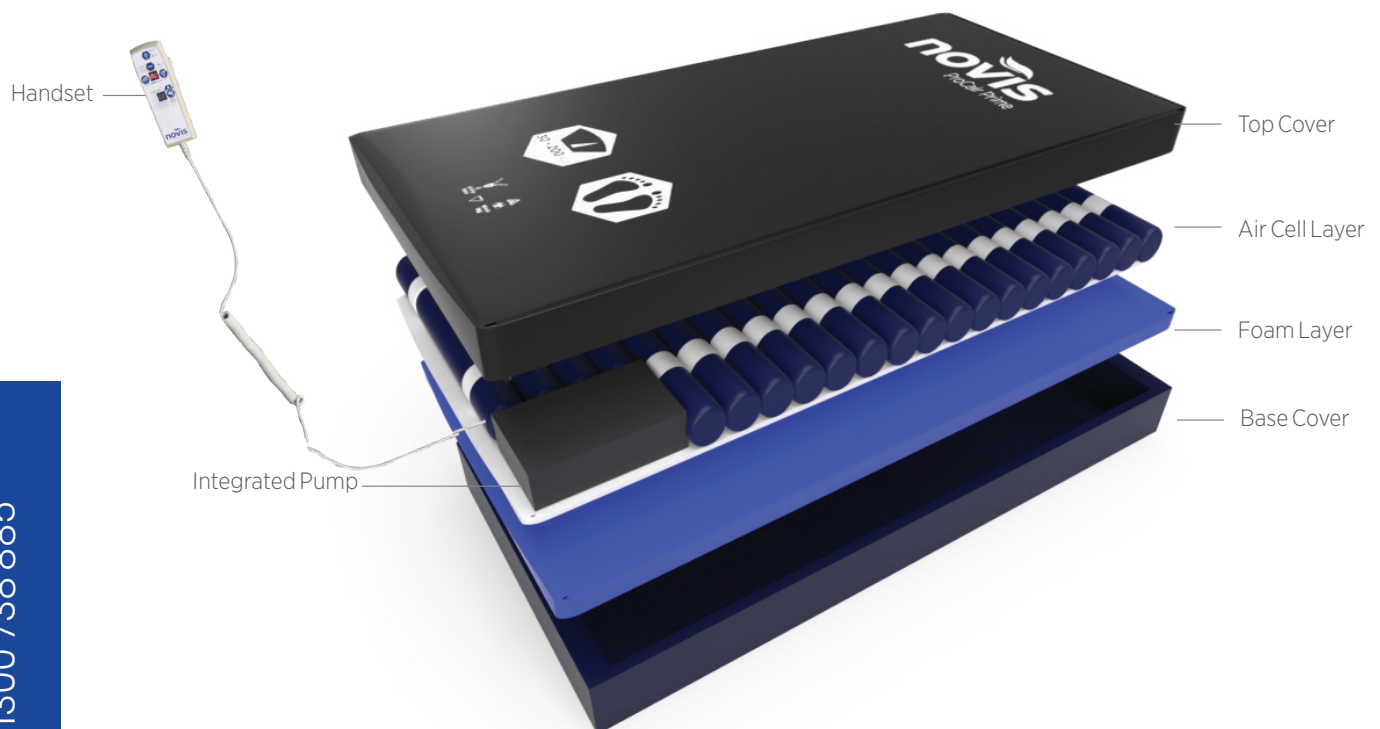

- Unique built-in pump mitigates damage
- Cyclical automatic weight sensing technology delivers optimal pressure care
- Adaptable for different clinical needs: can be used as a fully alternating pressure mattress (dynamic mode) or easily converted to hybrid mode by positioning the foam layer above the air cell layer
- Easy to use handset can be operated by user or carer
- Quick twist CPR valve

BetterLiving Range

BetterLiving alternating pressure surfaces are designed to offer a cost effective solution for the prevention and management of pressure related injuries.

Ideally suited to home care or aged care environments, the BetterLiving APMs can be used for people at medium to high risk of developing pressure injuries.

Harnessing the latest technological features for improved clinical care, and featuring automatic weight sensing technology to deliver fail safe user comfort levels irrespective of their position.

Designed for basic ease of use and minimal maintenance, and requiring minimal technical training or support.

AutoCair

Automatic weight sensing technology that automatically adjusts the pressure settings to keep the client within a safe pressure range for effective therapy.

SafetyCair

The ultimate protection from 'bottoming out', alternating air cells contain a lower 'safety cell' which remains fully inflated to provide greater surface stability and user safety.

CycleCair

With a default cycle time of 10 minutes, and the ability to adjust the alternation cycle time from 10-15-20-25 minutes for specialised alternation therapy when clinically advised.

Fowler Boost

The Manual Fowler Boost mode adjusts mattress pressure to provide increased support under the sacral area when the backrest is raised to deliver comfort and support when positioned upright.

BetterLiving Mattress Replacement

A cost-effective alternating pressure mattress for prevention and management of pressure injuries for high risk individuals. Ideally suited to home care or aged care environments.

- Automatic pressure setting
- Replaces existing mattress for superior therapy
- Constantly inflated base layer of cells for user safety
- Quick pull CPR for rapid deflation

BetterLiving Mattress Replacement Single	2030 x 900 x 200 mm	APMBL-R02
BetterLiving Mattress Replacement King Single	2030 x 1050 x 200 mm	APMBL-R02K

BetterLiving Mattress Overlay

A cost-effective alternating pressure mattress overlay for prevention and management of pressure injuries for low to medium risk individuals. Ideally suited to home care or aged care environments.

- Automatic pressure setting
- Easy to operate and maintain
- Quick pull CPR for rapid deflation
- Used over existing mattress for basic support (Safety Underlay recommended. See page 24.)

BetterLiving Mattress Overlay Single	2030 x 900 x 130 mm	APMBL-L02
BetterLiving Mattress Overlay King Single	2030 x 1050 x 130 mm	APMBL-L02K

CairMax Duo

A versatile foam air support surface with the ability to alternate between static or dynamic support, in response to the needs of the user. With a focus on support and versatility, the mattress functions as a static pressure relieving surface without the control unit. However, when clinically required, can 'step up' to provide dynamic support with the control unit connected.

Versatility

Mattress and control unit can be purchased as a system or separately. CairMax Duo can be placed on any bed frame to provide super static support. Add a control unit for increased therapy if needed.

Simplicity

The 'plug and play' system is very simple to use and requires minimal training to operate, making it ideal for community or aged care use.

Safety

No more concerns over correct pressure level settings due to the AutoCair automatic weight sensing technology. The feature quickly adjusts the pressure settings to keep the user within a safe pressure range for effective therapy.

Comfort

Has a durable foam core combined with alternating air cells embedded with castellated foam, plus a memory foam top layer, to deliver comfort and support for users up to 230 kg.

CairMax Duo System Single	2000 x 880 x 180 mm	FAMCM-R01-V2
CairMax Duo System King Single	2000 x 1050 x 180 mm	FAMCM-R01K-V2

CairMax Duo, Mattress Only King Single	2000 x 1050 x 180 mm	FAMCM-M01K
CairMax Duo, Control Unit Only		FAMCM-CU01

*Latex free top cover

AreaCare Range

A clinically designed and comprehensive range with extensive features to offer optimum care and comfort

Choose from the AreaCare Range of foam mattresses for envelopment and immersion for individuals at risk to medium risk of pressure injury. Featuring multi-density foam layers and shear reducing top covers designed to improve clinical outcomes and comfort. Each foam layer is made of varying densities to maximise the redistribution of pressure and enhance skin integrity.

Top Cover

Latex free, multi-stretch polyurethane coated top cover for reduced shear and friction. Vapour permeable, bacteriostatically treated, fire retardant and water resistant. Double-layered waterfall skirt provides protection from moisture ingress.

Cover includes an asset management panel and all relevant TGA required information.

Infection Control

Top cover seams are welded and/or tape sealed for maximum infection control.

All models feature a waterfall skirt.

Hinged Base

Six hinge system to conform to profiling beds and enhance mattress flexibility.

Side Bolster

All models feature a side bolster to provide a firm surface for reduced risk of falls when sitting on edge of mattress and easier transfers.

Top Layer

AreaCare Optimum
Features a castellated memory foam top designed to enhance pressure redistribution and articulation with movement.

AreaCare Premium
Supportive memory foam top layer, that contours to the body's shape, promoting even pressure distribution.

AreaCare Comfort
Features a castellated non memory foam top layer with higher resilience, allowing for easier repositioning.

Inner Cotton Cover

Foam covered by an inner cotton cover for added foam protection and reduced shear.

Support Layer

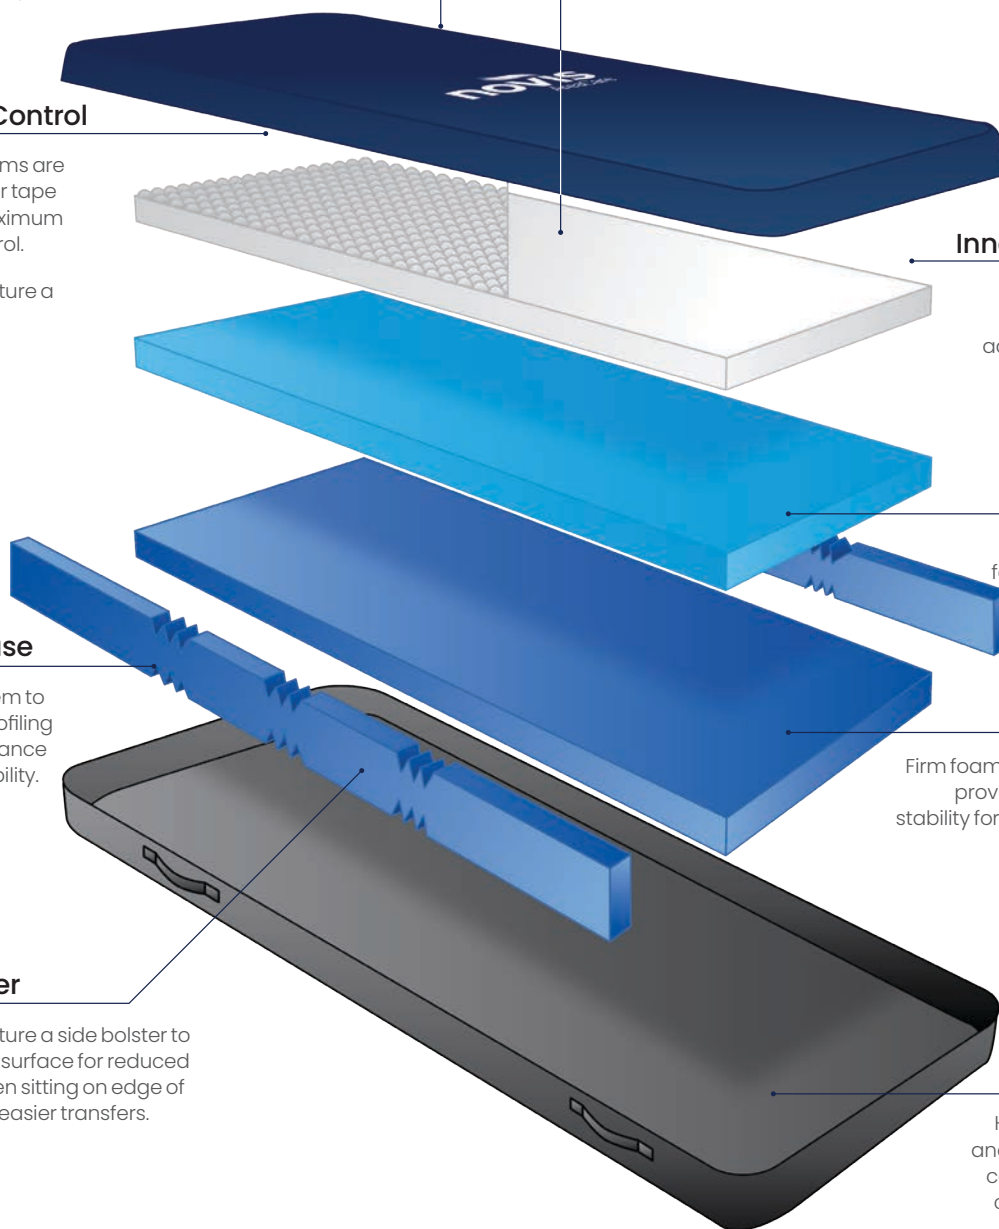

High resilience foam for maximum pressure redistribution.

Core Layer

Firm foam core layer and edges provide form, strength and stability for maximum safety and reduced risk of falls.

Base Cover

Hard-wearing, welded and water resistant base cover material with two carry handles per side.

Newport Floorline Bed

The Newport Floorline Bed is an electrically actuated floor line care bed with various positional movements and additional features, including an auto-regression backrest, under bed lighting and linked braking that assists caregivers and provides user comfort.

Maximum Versatility

Single button chair function and auto contour features allow for easy positioning options.

Ultra Low Height

Designed to reduce the risks of injury from falls, the 110 mm low height from the floor minimises potential for injury and increases user safety in the event of a fall.

Quality Construction

Powder coated steel main frame for maximum strength. Includes soft, contoured mattress retainer handles for inbuilt safety. Powered by a high quality reliable Linak electric drive system with an inbuilt backup battery available as an optional accessory.

Base Extension

The built-in base extension increases the length of the bed platform by a maximum of 200 mm.

Linked Braking System

Both foot end castors are linked and lockable in a single motion.

Adjustable Height

Bed Height Range 110 – 740 mm

	OVERALL DIMENSION (UNEXTENDED)	RECOMMENDED MATTRESS DIMENSION	
Newport Floorline Bed Single	2115 x 920 mm	1980 x 880 mm	BE1010

	Back Up Battery		BE9013

BetterLiving Community Bed

The BetterLiving Community Bed offers the practical convenience of a nursing bed combined with a simple design and ease of use.

A range of optional accessories, plus the advantage of easy assembly, transport and storage, make this a versatile and adaptable bed for community or aged care use.

Multiple Positioning

Operates as a four part, profiling bed with electric Hi-Lo height adjustment, back rest, knee break and Trendelenburg tilt – to deliver multiple positioning options to suit every need.

Length Extension

The built in base extension increases the length of the bed platform by 200 mm.

Hand Controller

Lightweight, water resistant hand controller with soft touch buttons, including one-touch auto contouring. Features individual function lockout, ideal for patients with cognitive impairment.

Reduced Shear

Auto Contour feature simultaneously raises both the head and knees. The auto-regression backrest also reduces shear.

Quality Construction

Powered by a high quality, reliable Linak electric drive system. Mattress platform is easy to clean and service. Includes removable mattress retainer handles and four high quality individual locking castors for easy manoeuvrability.

Adjustable Height

Bed Height Range
330 – 730 mm

Patient Handling

Novis offers a broad range of patient handling solutions designed to provide safe and secure transfer. Focusing on user ergonomics, safety and therapeutic benefits, we specialise in transfer aids that provide the best in pressure care treatment and prevention while reducing the risk of injury involved in providing care.

Floor Hoists
Sit to Stand Solutions
Ceiling Hoists
Slings
Horizontal Positioning
Seated Positioning
Seated Transfer
User Support
Special Solutions
Pool Lifters

Manual handling represents one of the most important WHS challenges facing the healthcare profession.

Traditional manual handling standards are evolving and the need for a holistic approach is key in ensuring the best manual handling outcomes.

It is important to fully understand a user's needs when selecting the correct equipment.

Manual Transfer Products – An Assessment Guide

Always identify whether the individual is 'able to assist' or is 'dependent'. A user would be identified as 'able to assist' if they are able to understand instructions, is co-operating and would be physically able to assist in the process.

If they do not meet these criteria, they would be determined as 'dependent'.

Determine the user's ability to assist through:

- Cognitive signs
- Physical signs
- Behavioural signs
- Clinical constraints

Once the initial assessment has been carried out, select the manual handling methods and equipment that present the lowest risk appropriate to the situation.

Lifters

Provide a safe and effective method of moving, transferring and repositioning a user in a secure and controlled manner. Consisting of a range of Floor Lifters and Ceiling Hoists, they provide mechanical and ergonomic assistance to carers as well as flexible manual handling environments.

Slings

Designed to reduce the physical effort and injury risk involved in transfers, slings typically utilise mechanical lifting equipment to enable transfers. Available in multiple configurations for general transfers, toileting, in-situ, gait training and bariatric requirements – there is a sling to suit every user's needs. All slings offered by Novis are typically compatible with all brands and lifter types.

Transfer Aids

Designed to provide assistance, facilitate transfers and enable frequent repositioning, transfer aids improve care and quality of life for users, while reducing strain on caregivers.

The Novis range includes a variety of exclusive and specialist transfer aids with a focus on being user-friendly and improving user dignity and provide solutions to unique repositioning challenges.

molift[®]

by Etac

Molift **hoists, slings** and **transfer aids** are designed to **support safe, comfortable** and **dignified transfers** for both the user and the caregiver.

Founded in 1981 in Norway, Molift invented the world's first battery-operated hoist. The brand was acquired by Etac in 2010 and today offers a wide range of patient handling solutions for sitting, standing, gait training and horizontal transfers across various care settings.

Known for its ergonomic design, reliability and low maintenance requirements, Molift products are developed with the user and caregiver in mind. Like all Etac brands, Molift products combine design innovation with high-quality materials and durable manufacturing to deliver long-lasting solutions.

The commitment to quality is backed by a comprehensive warranty and rigorous safety standards. Every product is developed to meet demanding testing and regulatory requirements worldwide, supported by a team of industrial designers, clinical experts and industry specialists with a deep understanding of user needs.

Molift Standards

Molift is certified to internationally recognised ISO standards, supporting quality, safety and environmental responsibility across its products and processes.

Quality Assurance

Molift is certified to ISO 9001:2015, ensuring strict quality management throughout product development, manufacturing and delivery.

Traceability

Molift meets the traceability requirements of ISO 13485. All hoists and slings are labelled with barcodes and unique serial numbers for clear identification in the market.

Environmental Responsibility

Molift is certified to ISO 14001 and works continuously to reduce the environmental impact of its operations, including raw materials, emissions, recycling and energy use.

Molift Smart 150 – Generation 2

Awarded for Design Excellence in Europe, the Molift Smart 150 is a foldable, lightweight, portable patient lifter designed to be easily wheeled and transported.

- Comfortable and spacious hoisting
- Compact and foldable without tools
- Lightweight aluminium design at only 26kg
- Lift from floor
- Easy to manoeuvre with compact footprint
- Refer to pages 48 – 51 for the Molift Rgo range of slings

Smart 150 – Generation 2	M1020
Soft Travel Bag	PHMOLSC
Accessories	Premium Soft Travel Bag 3049177
	Travel Suitcase 0990200

Compact, mobile hoist

Molift Smart 150 is designed for home care, travelling and easy storage. It is easily wheeled and is foldable in one piece without using any tools.

Lightweight and unique construction

Due to its light weight, small footprint and unique construction, Molift Smart 150 is easy to manoeuvre even in narrow spaces.

Comfortable and safe transfer

The hoisting range of 27 – 168 cm provides an excellent maximum hoisting height and at the same time gets very low, facilitating hoisting from the floor. The standard 4-point sling bar ensures a comfortable and spacious hoisting position for the user.

Molift Mover 180 – Generation 2

The Molift Mover 180 is an all-round patient lifter suited to home care, aged care and hospital use.

- A lightweight aluminium design with compact footprint
- Electronic leg spread functionality
- Very easy to manoeuvre at only 32 kg
- Large hoisting range of 27-163 cm
- Hoisting from floor
- Refer to page 37 for a comprehensive range of compatible sling bars
- Refer to pages 48 – 51 for the Molift Rgo range of slings

Raizer II Lifting Chair

A portable lifting chair designed to safely raise fallen individuals from the floor to a seated position.

Operated by remote control, it enables a single caregiver to perform lifts quickly and safely while reducing the risk of back and shoulder injuries.

Ideal for home care, aged care, healthcare facilities, and emergency response services.

- Safely lifts fallen individuals from the floor to a seated position with the touch of a button
- Enables a single caregiver to perform lifts without manual handling, reducing the risk of back and shoulder strain
- Portable and easy to assemble, making it ideal for home care, aged care, healthcare facilities, and emergency services

Raizer II Lifting Chair MHLU-105029

Etac Turner PRO

Provides user support during transfers between seated positions. Enables ergonomically correct positioning for the caregiver, reducing the risk of falls.

- Turning and transfer aid for weight bearing patients
- Lightweight and compact at only 7.5 kg
- Minimal adjustment between users
- Reduces risk of falls and caregiver injury
- Ergonomic working position for carers, while maintaining eye contact
- Enhanced compact design with moulded parts for easy cleaning
- Contrasting orange coloured handle for high visibility
- Soft, comfortable individual angled leg supports

Handle

Multiple ergonomic grip options for the user and carer, ensuring both comfort and ergonomic positioning of hands.

Central brake

Intuitive one-foot touch central brake, locking both wheels, regardless of their positioning, while also providing both auditory and visual feedback.

Seat pads

The stable seat pads enhance a comfortable transfer for the user. The incut edges provide a good grip, making folding them up and down easy for the carer.

Turning radius

High quality wheels for exceptionally easy manoeuvring meaning minimal force is needed when pushing/pulling the device.

Molift Quick Raiser 2

Automated sit to stand hoist with wide opening electronically adjustable legs.

- Inclined lifting column to recreate the natural pattern of movement
- Electrically adjustable legs, ideal for when the hoist is used together with chairs with no accessibility underneath, such as electric wheelchairs and recliners
- Unique wheel positioning provides exceptional manoeuvrability

Molift Rail System

A cost-effective and flexible solution for all environments

Efficient installation process

The Molift Rail System has rail profiles with innovative solutions for integration into all types of ceilings and walls. The wide range of fixing options results in making it one of the most efficient installation processes in the market. It is easily integrated and aesthetically adjusted to the design and architecture of the room. The range of switches and other transition options make the rail system extremely flexible.

Customised capacity

Depending on the different requirements and choice of the hoist motor, the Molift Rail System can be constructed to have a lifting capability up to 500 kg.

Cost effective solutions

The efficient installation process, versatility and many features make Molift Rail Systems a cost-effective, competitive and profitable investment for hospitals, facilities, health care settings and the home. This helps create a practical and efficient workplace for nurses and caregivers, as well as an attractive environment for users and visitors.

Traverse rail system

One of the most flexible solutions on the market, covering all needs of hoisting, regardless of renewal or equipment changes in the room.

Traverse switch

Enables two different rail systems to be connected, for example between a traverse system and a single rail. Very useful for transfers from one room to another.

Single rail system

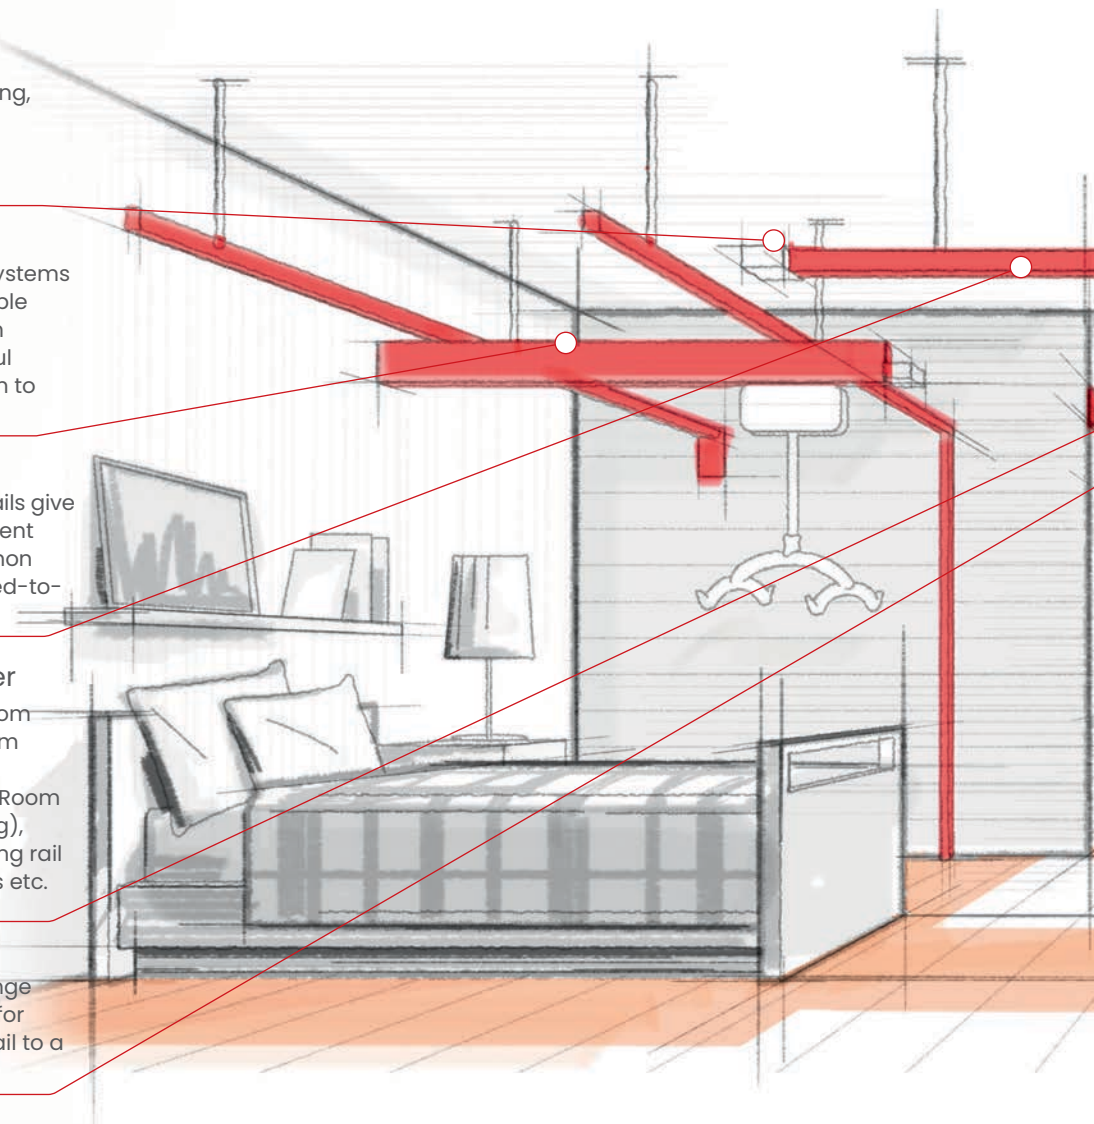

Straight rail and/or curve rails give a simple and effective patient transfer for the most common lifting situations, such as bed-to-wheelchair hoisting.

Room to room transfer

When transfer is needed from one room to another or from one rail system to the next system, Molift can provide Room to Room function (Climbing), switch systems or continuing rail systems through doorways etc.

Rail switch

Rail switch enables a change of direction of single rails, for example from a straight rail to a curve rail.

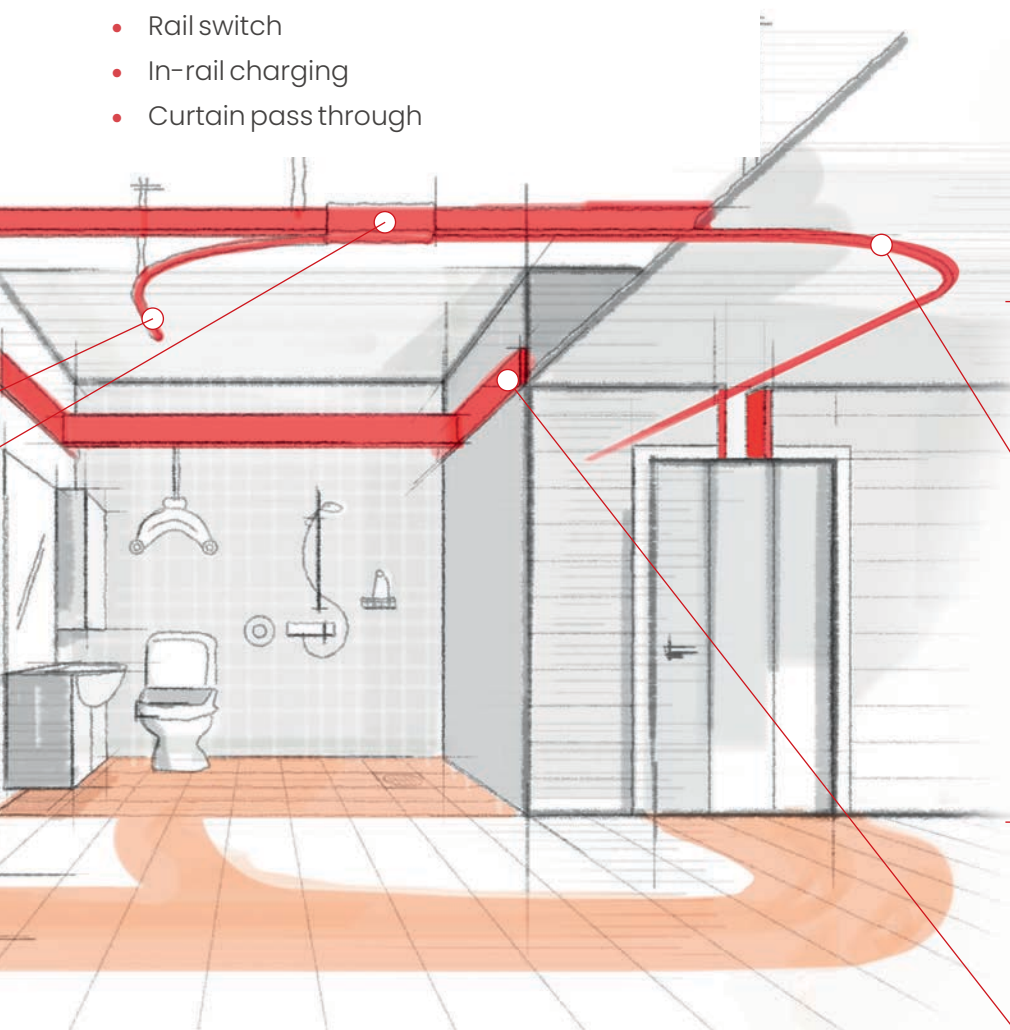

Flexible system

- Easy to install
- Various weight classes
- A variety of installation options – integrated in, or under the false ceiling, on the wall, on the floor with upright supports, etc
- Can be installed in all types of ceilings, walls and floors

Possibilities

- Straight profiles
- Curves – 30, 45, 60 and 90 degrees
- Fixed brackets, telescope brackets
- Flexible traverse options
- Traverse switch
- Rail switch
- In-rail charging
- Curtain pass through

**Interested in a Ceiling
Hoist Quote?
Want to become a
Molift Accredited
Partner?**

**Contact
novis@novis.com.au
for more information.**

In-rail charging

In rail charging allows the hoist to charge batteries automatically anywhere in the system. This way the hoist is always ready for operation. In-rail charging can be mounted in straight rail and traverse rail systems only.

Integrated rail

A single integrated rail offers a very discrete and clean solution.

Curtain pass through

Curtain pass through allows gaps for curtains mounted in the ceiling of the ward. This means several beds can share one motor, and still maintain privacy when individual nursing is required.

Wall mounted rails

If the ceiling cannot support the system, it is possible to mount the rail on the wall.

Molift Quattro Gantry Frame

Molift RgoSlings

Molift RgoSlings are high-quality slings with excellent ergonomics for comfortable hoisting. The anatomical shape allows for the natural curvature of the spine. The fixed padding both in the back and leg parts ensures maximum comfort.

Molift RgoSlings are primarily designed for a 4-point sling bar, but may also be used with a 2-point sling bar. The seated slings have a unique sliding loop function on the head straps to balance the weight distribution in every stage of the transfer, making it very comfortable to hoist from a lying to a sitting position and vice versa. Guide straps and application pockets make the application and positioning more ergonomic for the carer and more gentle for the user.

Sliding loops

Sliding loops on head straps. Making a smooth transfer from lying to sitting position. Ensures a comfortable and safe position for the patient.

Colour coding

Colour coding of hoisting loops helps you find the right fit.

Comfortable padding

Padding in back and leg supports distributes the weight over a larger area, making the sling more comfortable for the user.

Labelling

Clear, practical information on a highly visible label. Washing instructions and technical information are found in a protective pocket at the back.

Guide straps

Guide straps assist with positioning during the lifting process.

Application pocket

Pockets in the back and on the leg supports make application easier.

Backed With Confidence

Quality you can count on

Every Novis product comes with a minimum one-year warranty, with many products covered for up to five years. **Choose Novis and choose peace of mind.**

This catalogue shows our warranty offer. Ask your Novis representative if you have any queries.

Versatile for **patient transfers, toileting or bathing**, the ProSling range includes both pivot and yoke styles with a durable embroidered information label.

ProSlings are developed to suit the majority of lifter products on the market, and include three loop support straps and keyhole clips to suit yoke or pivot connections.

All ProSling products are subject to rigorous testing and standards (ISO 10535:2006). The slings are available in a range of sizes (with colour coded straps) to accommodate the variation in patient height, shape and weight.

ProSling Yoke General Purpose

- General purpose sling for patients with basic upper body control

ProSling Yoke General Purpose with Head Support

- Inbuilt head support for patients with less control

ProSling Yoke Hygiene

- Designed for toilet transfers
- Open area from mid back to mid thigh
- Buckle waist strap for added security
- Generous under arm padding

PROSLING PIVOT HYGIENE

Immedia is Etac Group's specialist brand for **manual patient handling** and **transfer solutions**. The brand focuses on reducing caregiver strain while improving user comfort, safety, and independence through clinically designed, ergonomic transfer and repositioning products. Immedia is recognised for its high-quality materials, evidence-based product design, and commitment to safer manual handling practices. The brand complements powered lifting solutions by addressing everyday repositioning and transfer tasks where manual assistance remains essential.

The Immedia portfolio is focused on providing innovative solutions that support safe client movement across hospitals, aged care, rehabilitation, disability, and home care environments.

Offering a specialised range of manual handling solutions:

- Horizontal positioning
- Seated positioning
- Horizontal transfer
- Sit to Stand transfer
- Transfer aids
- Special solutions

Single Handed Care

A key focus of the Immedia portfolio is supporting single-handed care by enabling one caregiver, where clinically appropriate and supported by individual risk assessments, to safely perform repositioning and transfer tasks that traditionally required multiple staff.

Through low-friction technologies, ergonomic design, and evidence-based manual handling techniques combined with intuitive design features, Immedia helps healthcare providers improve efficiency while reducing the risk of musculoskeletal injuries.

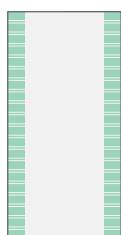

Immedia SatinSheet System

- Complete 'in-bed system' for turning and positioning
- Carefully designed system of base sheets and draw sheets that work together in various combinations, depending on patient needs
- Less friction between user and bed for reduced risk of injury and shear
- Low friction satin material encourages movements
- Can be used to replace regular bed sheets
- Select type of base sheet based on the user's ability – Mini Sheets for independent users, who turn themselves in bed. Midi Sheets for partly dependent users, who are able to bend knees and push off with feet. Maxi Sheets for very dependent users, who need assistance moving legs/feet
- Two part system – both components are required for product to work as intended

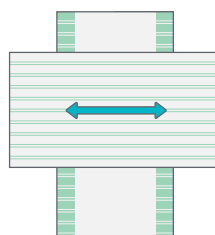

2Direction Flat Base Sheet	Single (midi)	2000 x 1400 (Satin 700 x 1400) mm	IM4113S
	King Single (midi)	2300 x 1400 (Satin 850 x 1400) mm	IM4176S
	Single (maxi)	2000 x 2000 (Satin 700 x 2000) mm	IM4114S
	King Single (maxi)	2300 x 2000 (Satin 850 x 2000) mm	IM4177S DVA
	Double (midi)	2300 x 1400 (Satin 960 x 1400) mm	IM4179S
	Double (maxi)	2300 x 2000 (Satin 960 x 2000) mm	IM4180S

In2Sheet with Incontinence Pad – 4Direction	Mini with Wings/Handles	1850 x 900 mm	IM4110SH
	Midi with Wings	2200 x 1400 mm	IM4140S
	Midi with Wings/Handles	2200 x 1400 mm	IM4140SH
SatinSheet Pillow Case		600 x 700 mm	IM4117S

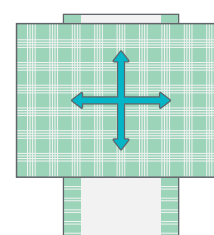

SatinSheet 2Direction BaseSheet

Start with a 2Direction BaseSheet that is fitted directly to the mattress. The BaseSheet has a low friction sliding satin area in the centre, allowing independent side to side movement. Lengthways the BaseSheet has high friction edges to minimize the risk of sliding off the bed.

SatinSheet 2Direction DrawSheet

Add the 2Direction DrawSheet for a partly dependent user who needs assistance with side to side movement. The DrawSheets are designed to be used on top of the BaseSheet. They do not work on their own.

SatinSheet 4Direction DrawSheet

Add the 4Direction DrawSheet for a dependent user who needs assistance moving in all directions. The DrawSheets are designed to be used on top of the BaseSheet. They do not work on their own.

Immedia 4WayGlide System

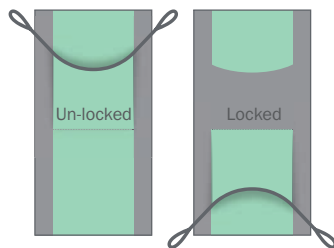

200
KG

2
YEAR
WARRANTY

- Complete 'in-bed system' for turning and positioning for users with limited mobility
- Ultra low friction surface for movement in all directions
- Nylon Sheet features elastic corner straps
- Glide Mattress available in standard and maxi sizes
- Nylon Sheet option available with locking mechanism
- Two-part system, neither component should be used as a standalone product

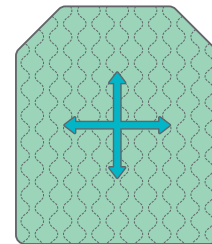

4WayGlide Base Sheet	Nylon Sheet with No Lock and Non-Slip Sides (Single)	850 x 2050 mm	IM85/200NS
	Nylon Sheet with Non-Slip Lock and Non-Slip Sides (Single)	850 x 2050 mm	IM85/200LPLNS
	Nylon Sheet with 2 x Non-Slip Locks (Single)	850 x 2000 mm	IM85/2002LPL
	Nylon Sheet with Non-Slip Lock and Non-Slip Sides (King Single)	1100 x 2050 mm	IM110/200LPLNS
4WayGlide Top Mattress	Glide Mattress, Polyurethane	1400 x 2100 mm	IM140/200LPLG
		1800 x 2100 mm	IM180/200GLPL

4WayGlide NylonSheet

Start with a NylonSheet that is fitted directly to the bed mattress. The low friction sliding surface allows the GlideMattress to easily slide on top. The 4WayGlide NylonSheet is designed to be used under the Glide Mattress and does not work on its own. Available in several variants.

4WayGlide Mattress

Add the 4WayGlide Mattress to assist moving in all directions. The Glide Mattress has handles on the underside providing a good grip for repositioning or to use with a hoist. Corner straps are placed under the bed mattress to prevent the users upper body from sliding when in a sitting position. Designed to be used on top of the NylonSheet. Available in two lengths - full, midi.

Immedia TwinSheet 4Glide System (Incontinent)

200
KG

2
YEAR
WARRANTY

- Complete 'in-bed system' for turning and positioning incontinent users with severely reduced mobility
- TwinSheet 4Glide system is a 2-part glide mattress with incontinence pad and handles
- Good access for care of pressure injuries, hygiene, dressing and bedding changes

Aqua Creek has been **developing aquatic access solutions** since 2002, **helping people** of all abilities safely participate in recreation, rehabilitation and fitness activities.

Known for its innovative pool lifts and accessibility equipment, Aqua Creek offers a range of solutions designed to accommodate different user needs, access requirements and pool configurations. Designed for safe transfers in and out of swimming pools and spas, Aqua Creek lifters

support wheelchair users and people with reduced mobility. By improving access to aquatic environments, these solutions help promote greater freedom, confidence and inclusion.

Hand-built in the United States using high-quality materials and manufacturing processes, Aqua Creek products are engineered for reliability, safety and long-term performance. Constructed from stainless steel with durable powder-coated finishes and quality electronics, Aqua Creek lifts are well suited to harsh Australian conditions.

Aqua Creek Ranger 2

Ideal for users that can self transfer.

- Stable, non-rotational design
- Field reversible
- Stainless steel construction with powder coat finish
- Includes submersible push-button remote control and rechargeable battery with wall mount charger

Ranger 2

F-RNGR2

Aqua Creek Admiral

Ideal for users that can self transfer and require a higher safe working load.

- Dual flip-up arms
- Adjustable lap belt
- Removable and adjustable foot rest
- Stainless steel construction with powder coat finish
- Includes submersible push-button remote control and rechargeable battery with wall mount charger

Admiral

F-ADMRL

Aqua Creek Mighty 600

Ideal for users that can self transfer and facilities that require a higher safe working load and more flexible install requirements.

- 360 degree rotation in either direction
- Fully automated operation
- Stainless steel construction with powder coat finish
- Includes submersible push-button remote control and rechargeable battery with wall mount charger

Mighty 600

F-MTY600

Aqua Creek Nebula

Ideal for access to spas and above ground pools using a sling seat attachment.

- Provides clearance of up to 152cm wall height (98cm Nano)
- 360 degree manual rotation
- Stainless steel construction with powder coat finish
- Includes submersible push-button remote control and rechargeable battery with wall mount charger

Bathroom & Hygiene

Novis offers an extensive range of bathroom and hygiene equipment designed to help maintain a user's bathing and hygiene routine. With a focus on function and ergonomics, these products are designed with both the carer and user in mind.

Mobile Shower Commodes
Commodes and Toileting Aids
Shower Chairs and Stools
Bath Seats and Boards
Safety Equipment

Personal hygiene has social and physiological benefits that support a user's wellbeing. Aside from basic personal hygiene, showering provides an opportunity to encourage independence, self-esteem and skills use.

Showering and personal hygiene routines can provide challenges for clients and carers depending on the client's individual requirements. It is important to ensure this process is carried out safely, and the comfort of the client is reassured at all times.

Selection Criteria

The following areas need to be considered when selecting products used in showering and personal hygiene routines:

- Range of mobility
- Comorbidities
- Level of assistance required
- Skin integrity

Commodes

To improve toilet safety, a mobile shower commode can be used to prevent falls during showering and toileting.

These multi-functional products can be adapted to a user's needs and environment.

Novis carries a range of commodes, bathroom and toileting aids.

Toileting Aids

Ideal for enabling independence and increasing safety in the bathroom, toileting aids provide assistance for users with a range of mobility or strength issues.

Toilet seat raisers are ideal for users who require assistance when transferring on and off the toilet. Incorporated arm supports provide stability and safety.

Shower and Bath Aids

Shower and Bath Aids are designed to assist in personal hygiene and independence. With a focus on falls prevention, these innovative designs emphasise ergonomics and safety to provide support where needed.

Creating Possibilities

Etac **bathroom safety, hygiene** and **daily living solutions** are designed to promote **independence, comfort** and **dignity** for people with reduced mobility or cognitive function.

Founded in Sweden in 1973, Etac is a global leader in assistive technology, offering a comprehensive range of solutions for home care, aged care and healthcare environments.

Known for its elegant design, functionality and reliability, Etac products are developed in close collaboration with users, healthcare professionals and industrial designers. The result is a range of solutions that enhance safety, comfort and ease of use for both users and caregivers.

The commitment to quality is supported by rigorous testing and regulatory compliance, ensuring products meet demanding international standards.

Etac Standards

Etac is certified to internationally recognised standards, supporting quality, safety and environmental responsibility across its products and processes.

Medical Device Quality and Traceability

Etac is certified to internationally recognised standards, supporting quality, safety and environmental responsibility across its products and processes.

Environmental Responsibility

Etac is certified to ISO 14001 and works continuously to reduce the environmental impact of its operations, including responsible management of materials, energy consumption, emissions and recycling initiatives.

Etac Design Excellence

Etac has been awarded numerous Swedish and international design awards. Characteristic design features, attention to detail and user-centred development continue to distinguish Etac products within the market.

The Clean Range

The next generation of mobile shower commodes, the Etac Clean range is comfortable, secure and easy to use. Developed for practical functionality, every detail of the commode chair is designed to make bathing and toileting easier for users and carers.

Offering a solution for any situation, the Clean range consists of:

- Clean – for general purpose use
- Clean Height Adjustable – for optimal fit over any toilet
- Clean Self Propelled – for users who can propel themselves
- A large range of accessories is available for customised use across the range.

Slim but Roomy

The smart design gives Etac Clean a large and comfortable seating area even though the chair is neat and slim.

Foot Support Designed for Protecting Feet

The practical foot support has a soft, rounded shape which gives the feet extra comfort and protection.

Fits over Toilet

Thanks to the upright operating handle, the chair is a perfect fit, even over wall-mounted toilets.

Easy Access

The chair is open at the back to facilitate access for hygiene purposes.

Etac Clean Mobile Shower Commode

- Manoeuvrable, push handle design with no welding seams or holes

The Swift Mobil-2 Range

The Swift Mobil-2 from Etac offers greater versatility and support whilst providing maximum comfort for both carers and users. Designed with several smart functions for simplicity and comfort, the range can be adapted to suit varying user needs.

Offering a range of solutions, the Swift Mobil-2 range consists of:

- Swift Mobil-2 – for general purpose use
- Swift Mobil-2 Self Propelled – for users who can propel themselves
- XL Back variants – to suit larger users
- Swift Mobil-2 Tilt – designed for users with higher needs
- A large range of accessories is available for customised use across the range.

Adjustable Back Support

The back support can be adjusted using velcro straps.

Ergonomic Foot Supports

The gently curved foot supports ensure comfort and stability.

Easy Height Adjustment

Swift Mobil-2 can be adjusted to different fixed seat heights. It is easily done from both sides without using tools.

Maintain Close Contact During the Tilting Process

The unique tilt function enables an ergonomically correct working position for the carer who is able to maintain eye contact with the care recipient. (Mobil-2 Tilt Models Only).

Foldable Arm Supports

The arm supports fold up to facilitate side transfer and are height and width adjustable to adapt to user requirements.

Etac Swift Mobil-2 Commode

- Fully height adjustable from 450 – 600 mm seat height (at 20 mm intervals)
- Soft, adjustable, non-stick, quick drying nylon back support
- Seat and back support easily detachable for cleaning or storage
- Swing away arm and foot supports
- Curved foot supports with side heel protection
- Large range of available accessories (see page 78)

Etac Alto Electronic Shower Commode

Alto is a chair with powered, adjustable height and tilt function. It offers exceptional maneuverability and ergonomic 360-degree access, reducing the risk of injury for caregivers.

- Powered height and tilt adjustment for optimal positioning and comfort
- Compact design to fit over most toilets and pass easily through doorways
- 360° caregiver access to reduce physical strain and support safer personal care

Ergonomic caregiver access

Assist in the entire hygiene routine without performing physically demanding tasks, overextending, or assuming awkward postures that can lead to work-related injuries.

Compact and purposeful design

Its purposeful design allows it to fit over most toilets and effortlessly pass through doorways, allowing users to remain in their homes with little or no remodelling required.

Easy to manoeuvre and operate

Enables single-handed transportation of the user to, from, and within the bathroom. This makes the caregiver's job easier, safer, and more enjoyable.

Enhanced comfort and convenience

With its adjustable height, tilt, and numerous accessories, user comfort and caregiver convenience are enhanced, thus improving the overall quality of care, dignity, and well-being.

Etac Alto

A chair with excellent manoeuvrability and 360 degree access, specifically designed to make personal care tasks easier for the carer while ensuring comfort for the user.

Alto with Pan Holder

80229604

Multi-adjustable head support

Designed to provide maximum comfort and flexibility. Can be adjusted to suit a range of user needs.

Adjustable width

Adjustable arm and leg supports provide additional space.

Intuitive hand control

User-friendly hand control with six buttons and a battery indicator.

Seating with open rear

Allows for easy access.

Adjust height and tilt

Can easily be adjusted to the preferred position.

Easy cleaning

IP46, non-corrosive material and few dirt traps.

Small footprint

Easy to navigate through standard doorways.

Clean design

Open sides for easy access.

Powerful battery

The powerful battery lasts for 70–100 usage cycles.

Small turning diameter

For easy manoeuvring in small spaces.

Non-Slip Mats

Novis is committed to providing practical solutions that support safety and independence in the home, hospital and aged care settings. Our BetterLiving Non-Slip Mat range features a colourful selection of indoor and outdoor mats designed to reduce the risk of falls, combining a low-profile design with a tapered safety border.

Indoor mats

Anti-fatigue mats

Toilet surround mats

Decorative mats

Cognitive mats

Outdoor mats

Non-Slip Mats

The core goal of BetterLiving non-slip mats is simple; **reduce falls risk in everyday environments** without changing flooring or installing permanent fixtures. With this in mind, BetterLiving non-slip mats focus is on practical falls prevention in everyday home and aged care settings.

Using superior materials and design methods, the mats provide a unique offering in the Australian market. The mats feature textured, high grip and an easily cleanable surface. With a low profile design and rubberised backing, they stay firmly in place on smooth floors.

Using **low odour nitrile rubber**, the backing is skid-resistant and repels oil and grease – this means the mat works well on all tiled, timber or lino surfaces. The mats also feature an anti-trip low profile border to ensure they lie flat to further reduce the risk of falls. The nitrile rubber is bonded to tufted nylon which resists fading and bleaching, while the crush-resistant pile traps dirt and extends the performance life of the mat.

“The
Original
& **Still**
the Best”

novis.com.au
1300 738 885

BetterLiving mats are **machine washable** and can be tumbled dried. They are ideal for home hygiene and commercial environments that require increased infection control practices.

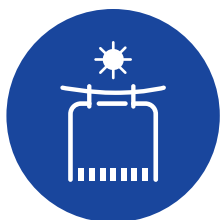

Falls Prevention

Low profile designs, tapered edges and non-slip materials work together to improve falls prevention. A tapered edge is especially effective in making the mats 'tripsafe' and a great alternative to a regular mat or floor covering.

Wash

BetterLiving mats are machine washable and can be washed regularly to maintain cleanliness and hygiene in temperatures up to 49 degrees Celsius.

Quick Dry

Once washed, the mats can be tumble dried up to a maximum drying temperature of 70 degrees Celsius. Quick drying makes cleaning and maintenance easy.

3 Year Warranty

We believe in the quality of our mats so much that we have extended the warranty to an impressive 3 years!

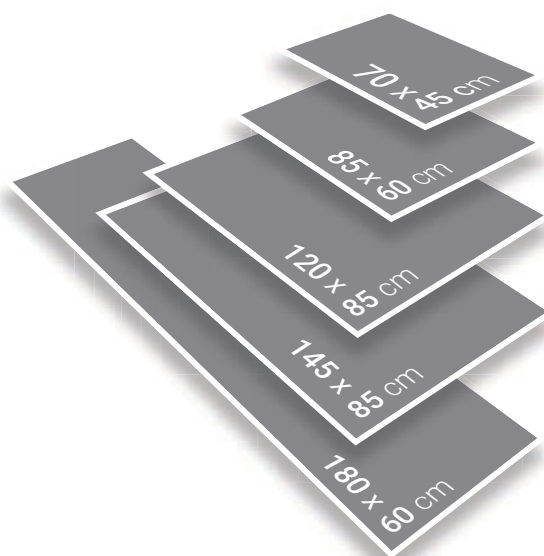

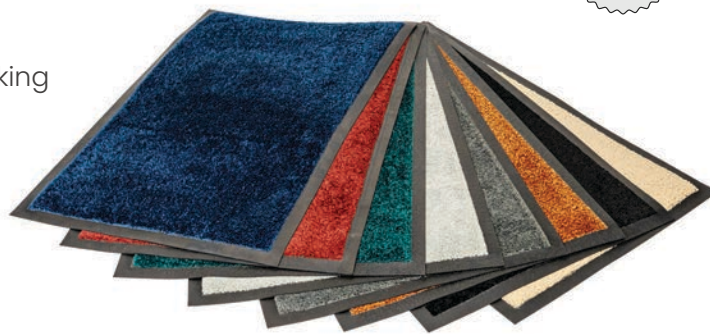

The BetterLiving Difference

- Anti Static
- PVC Free
- 100% solution dyed nylon surfaces
- 100% nitrile rubber backing
- Colour Fastness to Light; tested to JIS L 0843
- Colour Fastness to Washing & Laundering; tested to JIS L 0844
- Electrostatic Propensity of Carpets; tested to AATCC 134
- Surface Flammability; tested to ASTM D 2859
- High Traction; tested to NFSI 101-C
- Dust Collection up to 1400 g/sq.m
- Water Absorption up to 2200 g/sq.m

BetterLiving Indoor Mat – Solid Colour

- Tufted nylon with odourless nitrile rubber backing
- Superior dirt trapping capabilities
- Lies flat to reduce risk of trips
- Anti-trip border with low height profile
- Ultra grip minimises movement on smooth surfaces
- Can be machine washed and tumble dried
- 5 sizes and 8 colours

Aids for Daily Living

Novis offers an extensive range of products to assist users with their day-to-day activities. These items play an essential role in maintaining and supporting a user's independence whilst enhancing their quality of life.

Wheeled Walkers
Bathing and Grooming
Dressing and Reaching Aids
Cooking and Preparation
Eating and Drinking
Personal Medical Devices
Cognitive Aids
Falls Prevention Aids
Other Daily Living Aids
Cura Alarm Systems

Novis stocks a large and exclusive range of assistive living aids to help people with everyday tasks. Designed for people with limited or reduced flexibility, strength, or mobility, these ergonomic products help reduce strain on muscles and joints and support greater independence and improved well-being.

Bathing and Grooming Aids

A range of simple yet clever daily living aids designed to make bathing, washing and personal hygiene easier.

Dressing Aids

Products that help with various everyday dressing tasks. Offering additional support for users with restricted strength or mobility.

Reaching Aids

A range of ergonomic reaching devices to make reaching and gripping easier for those with limited strength or decreased grip.

Cooking and Preparation Aids

Clever aids for daily living, designed to make cooking and food preparation tasks easier and promote independence in the kitchen.

Eating and Drinking Aids

Specialised products to make eating and drinking easier for those with limited power and movement in their arms and hands.

Mobility Devices

Maintaining mobility is key to a person's independence and general well being. Mobility products help people enjoy a greater quality of life by supporting movement and stability.

Cognitive Aids

A range of products that provide support and increase safety for clients with cognitive impairments such as dementia.

Falls Prevention

A range of products to make the home environment safer. These aids help prevent fall-related accidents in and around the home.

Other Daily Aids

A range of smart products for daily living, all designed to minimise the main obstacles to living an independent life.

Oricom Amplified Phone with Picture Dialling

Oricom Care80S is an excellent amplified corded telephone with large picture dialling keys (including Braille dots) and great sound quality. It also has 6 photo buttons so you can add relatives pictures to instantly call them.

In addition, the phone is fitted with 2 direct memory keys. The Care80S is the ideal phone for people who have memory loss, moderate to severe hearing loss and or low vision.

WARNING: If connected via the NBN, this product may not be able to make calls during a power outage, please check with your service provider.

- 2 direct memory buttons (M1 & M2)
- 6 large one touch memory buttons (use with pictures or without)
- Amplified receiver up to 20dBA
- Extra loud ringer 85dB
- Handsfree Speakerphone
- Handsfree volume adjustment (8 levels)
- Variable pitch control (bass/treble)
- Hearing aid and T-coil compatible
- Large dialling keys with Braille
- Large high contrast keypad
- Bright visual ring indicator
- Wall mountable
- Compatible with the nbn™ broadband access network

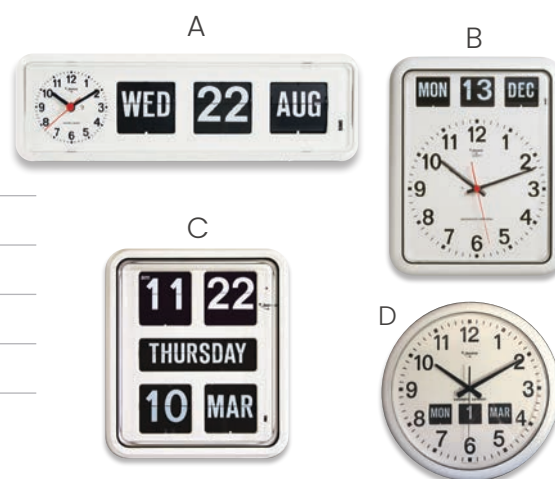

Amplified Phone with Picture Dialling CARE80S

Orientation Clocks

- Range of highly visible, easy to read clocks
- Simple operation

Cura1 Falls Prevention & Monitoring Solutions

Cura1 is the leading provider of reliable wireless falls prevention and monitoring solutions for aged care, hospitals and home care environments. Designed to help reduce falls risk and improve monitoring, the system alerts caregivers when assistance may be required. Durable, easy to use and simple to maintain, Cura1 products support safer care and greater peace of mind.

Wireless Floor Monitoring System

A complete wireless floor monitoring solution designed to help reduce falls risk when a person leaves their bed or designated area.

- Wireless system for easier installation and safer environments
- Low-profile floor mat helps reduce trip hazards
- Reliable alerts to support timely caregiver response

Universal Cordless Pad Transmitter	A	CUR2720
Cordless Dual Fold Floor Mat (1220 x 600mm)	B	CUR2672
3 Channel LED Pager with cover (83 x 55 x 26mm)	C	CUR3508

Wireless Chair Monitoring System

Chair monitoring solution designed to alert caregivers when a person leaves a seated position.

- Wireless monitoring and alerts
- Simple setup and maintenance
- Easy-clean chair pad design – non allergenic soft PVC

3 Channel LED Pager with cover (83 x 55 x 26mm)	A	CUR3508
Universal Chair Pad (38 x 25cm)	B	CUR2691
Universal Cordless Pad Transmitter	C	CUR2720

Wireless Bed Monitoring System

Bed monitoring solution that provides alerts when a user leaves or attempts to leave their bed.

Discreet monitoring installed beneath the mattress to provide early notification of bed-exit activity.

- Hidden beneath the mattress for user comfort
- Auto – reset if the person gets back into bed
- Self-calibrating technology for reliable performance works with a variety of mattresses

3 Channel LED Pager with cover	(83 x 55 x 26mm)	A	CUR3508
PreAlert Under Mattress Bed Pad	(810 x 240mm)	B	CUR2669

1
YEAR
WARRANTY

iBeam Motion Sensor System

Will alert when a person walks through the sensors' invisible beam. Let's caregiver know when a person is exiting an area or moving to an area deemed unsafe for them.

- Simple, affordable motion detection with narrow beam to reduce false alarms
- Quick installation adjacent to a bed or across a doorway
- On/off switch and low battery indicator for reliable, low-maintenance use

3 Channel LED Pager with cover	(83 x 55 x 26mm)	A	CUR3508
iBeam Motion Sensor	(38 x 25cm)	B	CUR2721

1
YEAR
WARRANTY

Wearable Wireless Call Pendant System

Lightweight wearable personal emergency pendant designed to let user call for help instantly whenever they are in range. Includes lanyard. A wrist strap is available, please order separately.

- Wireless alert straight care person's system or compatible pager
- Simple, affordable panic button. Large rubber button suited to elderly users
- Splash-resistant with a long-life, user-replaceable battery

3 Channel LED Pager with cover	(83 x 55 x 26mm)	A	CUR3508
Wireless Pendant	(38 x 25cm)	B	CUR2588

1
YEAR
WARRANTY

The Cura1 products listed are shown as a complete system. You can also buy each item individually. For more information on the extended range of CURA1 products please contact Novis.

Seating & Positioning

Novis offers an extensive range of specialised seating and positioning solutions designed to provide the user with added comfort, support and therapeutic benefits. Specialised pressure care cushions and seating solutions feature the latest developments in pressure care treatment and prevention.

Pressure Care Cushions

Lumbar Support

Positioning Devices

Specialised Heel Protectors

With a range of different pressure care solutions available, it is important to make the correct choice for user comfort whilst delivering the best clinical outcomes.

Completion of a thorough seating and mobility assessment is the key to identifying a user's specific seating needs.

The following issues must be addressed in order to determine the client's optimal seated position:

- Positioning
- Balance
- Pressure management
- Function
- Comfort

Positioning

The purpose of the seat cushion is to provide a stable support base that promotes postural alignment.

The cushion should support the pelvis in a neutral position (decreasing posterior/anterior tilt) to reduce development of kyphotic or lordotic spinal postures.

Balance

Cushion support is necessary to promote the user's balance in the chair or wheelchair.

The cushion surface must also assist in reducing risk of tissue trauma.

Pressure Management

Traditionally, the goal of seating products has been to reduce pressure by increasing the surface area.

Function

To provide even pressure through weight distribution, which contributes to better circulation and positioning.

Comfort

Utilisation of new technologies and contouring of the cushion surface allows for increase weight distribution, thereby reducing risk and ensuring user comfort.

Foam Cushions

Provide a stable, supportive seating surface while helping to manage pressure, maintain posture, and improve comfort for individuals who spend prolonged periods sitting.

Foam cushions are available in a range of densities, firmness levels and multi-layer constructions, allowing clinicians to select a cushion that best suits the individual's clinical needs and level of pressure injury risk.

Positioning Devices

Commonly used in wheelchair seating, beds, standing systems, and postural support systems to support body alignment, improve stability, maintain functional posture, and accommodate physical limitations.

Positioning devices are typically selected based as part of an individual's broader seating and mobility assessment by clinical personnel.

Air Cell Cushions

Provide the highest level of pressure redistribution and clinical benefits by allowing interconnected air cells to conform to the user's body shape. Air cells provide immersion and envelopment which results in pressure redistribution.

They require correct inflation and periodic pressure checks by a healthcare professional to ensure optimal clinical effectiveness.

Star is the **premium pressure care cushion** brand within the Etac Group portfolio, specialising in **advanced air-cell seating solutions** for users who require high levels of **pressure redistribution** and **postural support**.

About Star

Originally established as a specialist manufacturer of air cell wheelchair cushions, the Star brand has built a strong reputation among rehabilitation professionals, occupational therapists, physiotherapists, and seating specialists for its innovative approach to pressure management.

Star has continued to evolve as part of Etac's global seating and mobility offering, combining its heritage of clinical excellence with Etac's expertise in product development, quality systems, and worldwide distribution.

Why Air Cell Cushions?

Air-cell cushions are primarily chosen for maximum pressure redistribution and skin protection, particularly for users with neurological conditions, limited sensation or high pressure injury risk.

Foam cushions are generally chosen for comfort, stability, affordability, and lower-risk users, where advanced pressure management is not required.

In clinical seating practice, the choice is not simply air vs foam — it depends on the user's pressure injury risk, sensation, posture, mobility, sitting tolerance and ability to maintain the cushion. Premium air cushions such as Etac Star are typically positioned for complex seating needs where pressure management is the primary clinical objective.

Star Standard Air

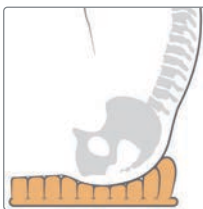

Single chamber air cell cushion with excellent pressure redistribution qualities.

High levels of immersion with excellent envelopment

Pressure redistribution is at its best with the enveloping qualities of the single chamber Standard Air cushion. The flexibility of the neoprene allows the cells to shape around the buttocks, keeping cell deformation to a very low level. Standard Air is available in two different heights: 5 and 10cm. The higher the cells, the better the pressure redistribution qualities.

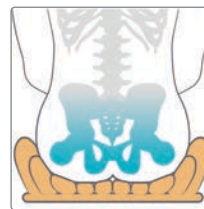

Features

One compartment with dynamic stability

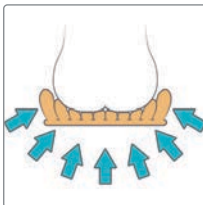

The air cells adapt to the body structure and follow the user's smallest movement without compressing the tissue. This can aid blood circulation. Perfect for users with low activity level.

Immersion and envelopment

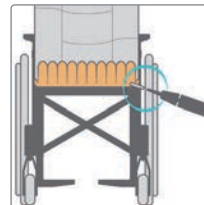

The air cells allow the user to immerse into the cushion and obtain the best envelopment. The higher the cells, the more immersion.

The Standard Air is available in 5 and 10 cm cell heights.

Pressure redistribution

Standard Air has excellent pressure redistribution properties. The air cells adapt to the body structure and reduce the risk of tissue deformation. Perfect for prevention and care of pressure injuries.

Easy handling

One compartment requires only one valve adjustment. The Standard Air Cushion is an ideal combination of easy handling and dynamic stability, which may improve sitting tolerance over time.

Available in a range of size options

Star Stabil-Air

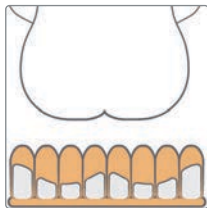

The Stabil-Air cushion is the perfect blend of multi air cell cushion with soft foam cylinders within each air cell.

Unique foam in cell air cushion

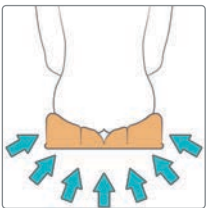

Each Stabil-Air cushion has soft foam cylinders within each air cell. The cylinders on the outside are higher, while those under the buttocks, coccyx and legs are lower, creating an anatomically shaped secondary layer of skin protection. This increases the stability and eases transfer to and from the cushion. The Stabil-Air cushion has one chamber which is easy to use and provides stability. The Stabil-Air is available in 7.5 and 10 cm cell height.

Features

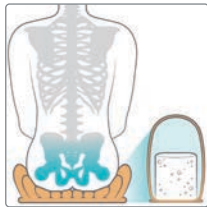

Single compartment with concealed stability

The Stabil-Air cushion has a soft foam cylinder within each air cell. They are anatomically contoured and add exceptional stability to a single compartment air cell cushion.

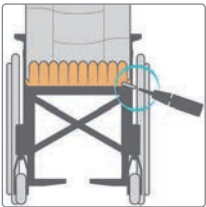

Pressure redistribution

The air cells formability adapts to the body structure, to minimise the risk of skin tissue deformation. Perfect for the prevention and care of pressure injuries.

Immersion and envelopment

The soft foam cylinders contain a considerable amount of air and allow the user to immerse into the cushion to obtain the best envelopment.

Easy Handling

One compartment requires only one valve adjustment. The Stabil-Air cushion offers an ideal combination of easy handling and stability, which can improve sitting tolerance over time.

----------------------	--------------------------------	--------

Immedia LeanOnMe

Positioning Range

LeanOnMe cushions are designed to help patients rest in supported positions that may enhance relaxation and facilitate respiration, while also reducing physical strain on caregivers during repositioning.

The range includes cushions in various shapes and sizes, such as wedges and triangles, designed to meet diverse positioning needs. These cushions provide stable support and assist with repositioning and transfers, helping make everyday care more comfortable and efficient.

- Soft, mouldable support for individual positioning
- Elasticity for pressure distribution
- Quiet materials for users with sensitive hearing
- Hygienic cover that is waterproof and easy to wipe clean.

Maxxcare[®]

Did you know that while heels are small, they are one of the **highest risk areas for pressure injuries?**

Maxxcare Heel Pro Evolution heel protector, represented in Australia exclusively by Novis Healthcare, is an advanced medical device designed to assist in the prevention and treatment of heel pressure injuries.

Using **VICAIR[®] air-cell technology** to redistribute pressure and protect against shear and friction, the Maxxcare Heel Pro Evolution is:

- A true **heel offloading** and **suspension device**
- Made of **soft breathable materials** for long term wear
- **Ultra-light weight** (0.1kg) in construction
- Made of outer nylon material helps **reduce shear & friction** during patient movement
- **Easy to fit** and stays in place
- **Machine Washable** at 60°C

Offloads
the heel &
redistributes
pressure

Maxxcare® Heel Protector

The MaxxCare Heel Pro Evolution is a clinically advanced solution designed to prevent and treat heel pressure injuries with exceptional effectiveness.

- Advanced protection for at-risk heels, featuring Vicair Smart Cells
- Delivers superior offloading, targeted pressure redistribution and strong protection against shear and friction
- Wearable during short-distance mobilisation
- Machine washable for improved infection control

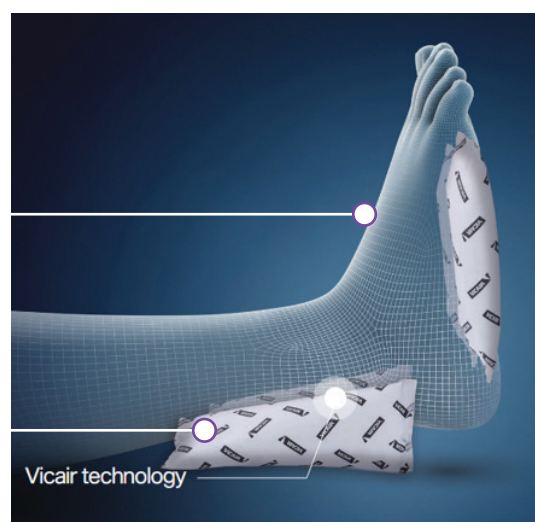

Heel Protector with Vicair SmartCells	Small	060004
	Standard	060001
	XL	060003

The Vicair SmartCells consist of four air-filled tubes that fit precisely into the Maxxcare Heel Pro Evolution.

Two side SmartTubes positioned along the side of the foot. These tubes are size specific and vary depending on the boot size

Two rear SmartTubes located at the back of the lower leg. These tubes are universal in size and remain across all boot sizes

Effective heel offloading

Lifts the heel to reduce pressure on vulnerable areas.

Pressure redistribution

Supports skin integrity and helps prevent and treat pressure injuries.

Lightweight design

Enhances patient comfort and supports compliance.

Proven technology

Developed with the same proven technology trusted across the Vicair portfolio.

Seamless compatibility

Designed specifically for the Maxxcare Heel Pro Evolution heel boot.

BetterLiving Silicone Fibre Heel Protectors

- Pressure relief and protection for heels and ankles
- Silicone fibre reduces friction and shear force
- Ideal choice for geriatric or palliative care
- Covered with breathable, machine washable cotton/polyester fabric for cool comfort
- One size fits all; sold as a pair

TA Service was founded in 1988 in Denmark. After seeking to improve the quality of life for their clients, the idea of engineering a fully customisable scripted chair was born. With ongoing feedback and co-created design with wheelchair users, TA launched a series of three unique electric wheelchair models to the European market. Today, TA, which is now part of the Meyra group, offers some of the best electric wheelchairs available and continues to provide outstanding products to clients worldwide.

As the exclusive distributor, Novis proudly recommends and distributes TA custom-built wheelchairs throughout Australia.

TA iQ Power Wheelchair

The TA iQ is a Scandinavian-engineered power wheelchair platform built for full-time everyday use – available in mid-wheel, front-wheel, and rear-wheel drive to match the user’s environment and clinical need.

Across all three configurations, 12” lift and 45° tilt are standard, the minimum seat plate height is just 15”, giving users low-profile table access and the ability to reach height without additional cost.

Modular components throughout reduce servicing time and future-proof the investment.

- Available in MWD (tightest turning radius, most intuitive to drive), FWD (superior obstacle and kerb negotiation, allows closer proximity to surfaces and counters) and RWD (directional stability and improved torque at speed on uneven terrain)
- 12” HiLo lift standard (15–27”); minimum seat plate height of 15” – lowest on the market; fits under tables, desks, and improves sightlines in vehicles; optional seat glide provides an additional 4.5” of anterior seat movement for even closer access to surfaces, counters, and workspaces
- 45° electric tilt standard across all configurations; electric backrest recline available as an optional upgrade for extended pressure relief and repositioning
- Now available with the Meyra MySeat® seating system – featuring a biomechanical backrest with antishear recline, modular backrest-to-seat width pairing for precise fit, and central powered legrest extending to floor for standing transfers. Fully modular design with independent wheel suspension

TA iQ Land Cruiser MWD Power Wheelchair

For users who love everything about the TA iQ but need to go further and faster — the LC version is built for it. Larger 4.00-6 drive wheels and 4" pneumatic castors replace the standard tyres, paired with 2 x 600W motors. All the same postural functions, lift, tilt, and modular flexibility of the standard iQ — on a chassis that handles challenging outdoor terrain.

- 2 x 600W motors standard; supplied at 10 km/h — 15 km/h option available, note that regulatory requirements may apply depending on state
- 4.00-6 drive wheels and 4" pneumatic castors standard — larger contact surface for traction, stability, and obstacle clearance on uneven terrain
- All standard TA iQ seat functions retained: 12" HiLo lift lift, 45° tilt, electric backrest, and full modular seating options
- Wider overall chassis (25–29") to accommodate larger wheels; ideal for users with an outdoor lifestyle

TA IQ Stand Up Power Wheelchair

The TA iQ Stand Up is the standing variant of the TA iQ platform — built on a front-wheel drive base for confident obstacle negotiation and closer proximity to surfaces.

It offers all the seat functions of the standard iQ range with the addition of a fully integrated standing function, available in sit-to-stand or lay-to-stand modes.

Additional support wheels deploy automatically when standing, providing stability in the upright position and enabling driving at a standing angle.

- Integrated standing function with individualised standing combinations; sit-to-stand and lay-to-stand options; gyro module standard for enhanced drive stability
- 300 mm HiLo lift standard; 45° electric tilt available as optional upgrade; memory function stores preferred standing, sitting, and care positions
- FWD base with 4" obstacle clearance — superior kerb and obstacle negotiation; 25.5" turning radius; suitable for indoor, outdoor, uneven terrain, and use as a car seat for both driver and passenger
- Crash tested and approved for vehicle use; weight capacity 140 kg; LED lighting, R-Net electronics, and 2 x 350 W motors standard

Meyra's collaborative approach to building the perfect wheelchair considers each user's unique goals, physical condition, environment, and future considerations.

As the exclusive Australian distributor, Novis is uniquely positioned to offer Meyra's custom-built, made-to-measure wheelchairs, seating options, and accessories on a trial basis to ensure a perfect fit for every user, every time.

Meyra Eurochair 2

A full-spec folding chair built for long-term everyday use. Premium materials, minimal repairs, and Meyra's modular build system mean long-term spare parts supply and fast refitting between users.

- Modular Eurochair build system — extensive accessories, guaranteed long-term spare parts, easy user-to-user refitting
- Double scissor and Varioblock rear wheel extension standard; from 17.5 kg
- Swing-away detachable legrests, height-adjustable side guard, depth-adjustable arm pad standard
- Crash tested ISO 7176-19; 3-year frame and scissor warranty

Meyra Eurochair 2

Specifications	Weight Capacity	130kg
	Seat Width	15–21"
	Seat Depth	15.5–19.5"
	Empty Weight	From 15kg
	Crash Tested	Yes — ISO 7176-19
	Warranty	3yr frame & scissor

Meyra Format 3.940

The entry-level lightweight folding chair from Meyra. Weighing from 17.5 kg, crash tested, and built for easy refurbishment between users — this is a reliable answer to volume standard chair prescriptions without the servicing headache.

- Front seat height adjustable (18.5" / 19.5" / 20") without parts swap — faster fitting, easier transfers, and straightforward refitting between users
- Narrowest in its class at seat width + 7" with quick-release axle; step aid standard
- Swing-away detachable legrests; lockable fold-back armrests; easy-release side guards — all standard, no add-ons needed
- Crash tested ISO 7176-19; 3yr frame warranty; angle-adjustable footrests and adjustable back strap standard

Meyra Format 3.940

	Warranty	3yr frame

Meyra Femto S Manual Wheelchair

The Femto S is designed for active users who need a foldable, flexible, light-weight chair without sacrificing everyday comfort and functionality. With swing-away and detachable legrests, the Femto S offers a seamless seat-to-frame transition, making side transfers easier. Suits a broad range of users and conditions.

- Hydroformed frame delivers +20% rigidity over comparable round-tube designs without added weight – from 9.5 kg ready to use
- Centre of gravity adjustable from +4.5" to -1" via telescoping rear frame; suits active through to passive seating needs
- Swing-away, removable legrests with single-finger release – operable with limited hand function; frame height aligned with legrests for smoother lateral transfers
- Crash tested as standard with no additional brackets required; modular design allows quick component replacement for straightforward servicing and future upgrades

Meyra Manual Accessories

Soft Roll Castor

For optimal steering performance and ride comfort.

Standard Wheels

Entry level – basic off the shelf wheel.

Off-Road Rims

Heavy duty wheels, for more adventurous wheelchair use.

Light Wheel

Lightweight wheel for ease of propulsion.

Spinergy Rims

Top of the line wheels. Lightweight yet robust, can be customised with colour and are available in carbon.

Curve L Handrims

Innovative profile enables you to gain controlled, low-effort grip while stabilising your wrist.

Fold Down Push Handles

Ability to fold down for transport or for active users not wanting to be pushed whilst in the chair.

Stabiliser Bar

Minimise flex in folding wheelchair. Also used to add stabilisation to bariatric manual folding chairs.

Height Adjustable Flip-Back Armrests

Commonly used when side transfers are still important to wheelchair user. Height and length adjustable.

Light Side Panel

Lightweight and fixed.

Side Panel with Armpad

Integrated arm rest in side panel, height adjustable.

Sideguards

Protects user from wheels without having armrests.

Elevating Legrests

Enabling individuals to raise legs whilst in wheelchair. Perfect for circulation and relieving lower limb pressure.

Different Legrests Angles

Hanger angle variances for preferred leg position of users.

Easy Unlock system

Quick release tab for ease of hanger release.

Single Footboard

Flip up to one side. Adding stability for heavier wheelchair users. Height adjustable.

Aluminium Footplates

Much stronger than plastic footplate. Height and angle adjustable.

See It. Try It.
Trust It.

Meyra Orbit 2 Power Wheelchair

The iChair Orbit 2 is Meyra's flagship compact mid-wheel drive power wheelchair — built for all-day independence across both indoor and demanding outdoor environments.

At the centre is the MySeat® unit: a fully modular, biomechanical seating system that adapts precisely to individual clinical needs and can be reconfigured as those needs change over time.

The plug-and-play platform means the seat unit, lift and tilt function, powerbase, and control system can all be swapped or adjusted quickly — making it a practical long-term solution for users and clinicians alike.

- MySeat® biomechanical seat unit — fully modular and individually configurable; adapts to changing clinical needs over the life of the chair
- Mid-wheel drive with turning radius of 27.5"; compact overall width from 23.5" for confident indoor manoeuvrability
- Electric seat tilt up to 50° and back angle adjustment up to 80° for effective pressure relief and repositioning
- Choice of R-Net or LINX control electronics; plug-and-play modularity across seat unit, powerbase, tilt/lift and controls

Meyra XL/XXL HD Power Wheelchair

The iChair XXL is Meyra’s purpose-built bariatric power wheelchair, designed for indoor and outdoor use for clients up to 250 kg. Reinforced components, rear-wheel suspension standard, crash testing and powerful dual motors combine to deliver reliable all-day performance without compromising on comfort or postural management.

- Seat width adjustable from 21–27.5” via simple telescoping of the seat plate and side guards – no frame change required
- Rear-wheel suspension standard for comfortable long-distance driving; powerful 2 x 300 W / 2 x 350 W motors with 10 km/h capability
- Electric seat tilt up to 18° and electric back angle adjustment up to 50° for effective pressure relief and postural management
- Seat lift of 12” (Drops SWL to 180kg); LED lighting front and rear; R-Net control with optional special control modules

Meyra Optimus 2 Power Wheelchair

The Optimus 2 is Meyra's purpose-built outdoor front-wheel drive powerchair — designed for users who need real-world range and terrain capability without sacrificing postural support. A 950W transaxle motor, independent four-wheel suspension, and large 14 x 4.5" front wheels handle kerbs, slopes, and unpaved surfaces with confidence.

Available with speeds up to 15 km/h and a range of up to 111 km, it's the chair for users who don't want to be limited by their environment.

- 950W front-wheel drive transaxle motor with independent four-wheel suspension; climbs obstacles up to 4.5" and gradients up to 18%
- Top speed up to 15 km/h with range up to 111 km depending on battery configuration — three battery sizes available
- Electric seat tilt up to 22° and electric back recline up to 50° for pressure relief; powered elevating legrests available
- ISO crash tested; R-Net control standard with programmable speed profiles.

Meyra Sky Power Wheelchair

The iChair Sky is Meyra’s compact mid-wheel drive power wheelchair with full standing function – purpose-built for users with more severe functional disorders including tetraplegia, muscular dystrophy, MS, and cerebral palsy.

An 8” seat lift and 40° tilt are standard, with standing angle up to 90° and an individually configurable standing curve stored via the Easy Memory Box.

At just 25.5” wide, it handles confidently in confined spaces while offering all-day comfort indoors and outdoors.

- Full standing function up to 90° with individually configurable standing curve via Easy Memory Box; legrest adjusts automatically from 95° to 170° with integrated length compensation
- 8” seat lift and 40° electric tilt standard; optional electric back angle adjustment up to 60° for comprehensive pressure relief
- Compact MWD with turning radius of just 25” and overall width 25” — exceptional manoeuvrability for indoor and confined spaces
- Biomechanical seat and back unit with MySeat system; seat width 15–25.5” via telescoping side guards; crash tested to ISO transport standard

Meyra Power Accessories

Two Rear Castors

Creating six points of contact for increased stability.

Single Rear Castors

Perfect for attendant controlled wheelchairs, with the single castor out of the way for carers. Also decreases chair's turning radius.

8' Castors

The ability to overcome outdoor obstacles whilst providing driver comfort.

Electric Recline

Up to 150° of backrest angle adjustment.

Armrests with Side Panel

Integrated side panel to provide support to thighs.

Long Armpad

Height adjustable, for longer wheelchair seating depths.

Short Armpad

Height adjustable, for shorter wheelchair seating depths.

Electric Elevating Legrests

Enabling individuals to electrically raise legs whilst in wheelchair. Perfect for circulation and relieving lower limb pressure.

Lights and Indicators

Enhances visibility and safety by providing head and brake lights and also left/right indicators.

LCD Joystick

Basic joystick with smaller screen for visibility.

Advanced Joystick

Top of the line joystick, larger LCD screen, can include Bluetooth

Shortcut Buttons

Enables power functions to be controlled through toggles or buttons. Can be mounted on either armrest or at rear for attendant control.

Swing-away Joystick Mount

Ability to swing away joystick when doing transfers. Can also enable chair to get closer to tables and objects.

USB Charger

Ability to charge a phone or tablet / communication device.

Phone Charger

Additional phone charger, separate to USB charger.

Netti was founded in 1988 in Norway with a focus on designing wheelchairs that increase the joy of life. Now part of the internationally renowned Meyra Group, Netti has grown into a globally recognised brand, distributing innovative wheelchair solutions to clients across the world. Working in close collaboration with therapists, seating experts, and wheelchair users, Netti developed the Netti Method which is a framework for designing seating solutions that adapt the wheelchair to the user, not the other way around.

Netti 4U CE Plus – Tilt in Space and Reclining Wheelchair

The Netti 4U CE Plus combines economy and individuality at the highest level. The frame design and extensive accessory range meet a wide range of user demands across a variety of presentations.

Lightweight and narrow, it is well suited to tight indoor spaces, side and hoist transfers, and easy transport in vehicles. Suitable for a broad range of users from seat width 14–19.5", the built-in adjustability means it can follow a user as their needs change — reducing the need for prescription changes and additional orders over time.

- +/- 1.5" of built-in seat width adjustability without frame change; seat depth adjustable 15–19.5" — one frame accommodates a wide range of user sizes over time
- Total width only 7" wider than seat width with standard wheels — compact footprint for narrow doorways, corridors, and tight indoor environments
- One-hand-operated removable arm support for easy side and sling transfers; folding brakes clear the way and provide safe attendant access
- Easy Care wipeable cover standard — hygienic solution suited to incontinence care, multi-user environments, and facility use.
- Crash tested to ISO 7176-19

Netti 4U CE Plus Tilt in Space Wheelchair

Netti V – Tilt in Space and Reclining Wheelchair

The Netti V combines the advantages of an active and a comfort wheelchair in one frame. Highly adjustable across seat width, depth, height, and back angle, it adapts to changing user needs over time – often without requiring new accessories or a chair change.

Well specified as standard, the Netti V includes:

- Drum brakes with combined tilt/recline handle
- Foot-operated anti tippers
- Easy Care wipeable cover
- Back cushion with side support
- Angle adjustable leg supports with calf support
- Adjustable footplates
- Removable arm supports with height and depth adjustment
- Arm pads
- Head support
- Built-in leg abduction (1" per side)
- 24" rear wheels
- 7" front castors

Netti V Tilt in Space Wheelchair

Specifications	Seat Width	14–21.5"
	Seat Depth	15–21.5"
	Seat Height (to seat plate)	13.5–20"
	Tilt	–3° to +30° (optional 45°)
	Recline	85°–130°
	Total Width	Seat width + 8.5"
	Total Length	39.5"
	Weight Capacity	135kg
	Crash Tested	Yes – ISO 7176–19

Netti V

Groundbreaking Seat Height Flexibility

The Netti V delivers 3" of seat height adjustment without changing wheel position, wheel size, or adding any extra parts. A total adjustment range of 6.5" is available when changing wheel size and position — meaning the same chair can follow a user from active hand propulsion through to full attendant-assisted use without a prescription change.

Easy for Carers

Netti V is designed to minimise complexity for attendants and clinicians alike. There are only 2 handles — tilt/recline and drum brake combined into one. Foot-operated anti tippers, colour-coded adjustment points, and readable scales mean fast, accurate fitting adjustments in the clinic or at the bedside.

Exceptionally Narrow Profile

The overall width of the Netti V is only 8.5" wider than the seat width with standard wheels. A 17.5" seat width chair has a total width of just 26" — making it well suited to narrow corridors, doorways, and smaller homes.

Designed for Asymmetries

The Netti V is built to handle complex postural presentations. Back tubes can be positioned inward (A-shape for narrow shoulders), outward (V-shape for broad shoulders), or asymmetrically. Stepless sideways adjustment of the head support and built-in stepless leg abduction of up to 1" per side are standard, with adjustable extension pieces to accommodate hip and pelvic asymmetries.

45° Tilt Option

For users requiring significant pressure relief or rest positions during the day, the Netti V is available with a 45° backward tilt option. Biomechanical pivot points at the knee and back hinges ensure correct seating position is maintained and shear is minimised throughout the tilt range — including when combined with recline.

Netti Dynamic CED

135
KG

5
YEAR
WARRANTY

The Netti Dynamic CED is designed specifically for users with involuntary extension movements, spasticity, or high muscle tone – including Dyskinetic CP, Dystonia, Huntington’s disease, Parkinson’s, Dementia, TBI, and Spinal Cord Injury. Rather than fighting the user’s movements, the Dynamic System absorbs them – the seat and back move with the user during a spasm, then return them to their original position once tone decreases. The result is longer daily sitting time, better pressure distribution, reduced sliding and shear, and less carer intervention for repositioning.

- Dynamic seat plate and 40° flexible back support standard – absorbs extension movements and returns the user to their original position once tone reduces; gas spring strength selected to match individual movement intensity
- Indicated for users with total extension spasms or involuntary movements of the hip, back, and legs – dyskinetic CP, dystonia, Huntington’s, Parkinson’s, TBI, dementia, and SCI
- Optional dynamic leg supports and dynamic head support – system configured to match the specific pattern and severity of the user’s involuntary movement
- Narrow overall width seat width + 7”; arm support swings back behind backrest for easy transfers; BodyPoint Evoflex stabiliser and frame extension included standard
- Crash tested ISO 7176–19; 3yr frame warranty; angle-adjustable footrests and adjustable back strap standard
